## Popis

With the certificate **Europe Inflation Bonus&Safety 21** investors receive an annual interest rate consisting of two components: 2.5% fixed interest rate plus the euro area inflation rate. The nominal amount is repaid at 100% if the EURO STOXX 50® index always quotes above the barrier of 49% of its starting value during the term. In the event of a barrier violation, investors are exposed to market risk on a one-to-one basis. In this case, a substantial capital loss is possible.

Details on the index can be found on [the website of the index provider STOXX](#)

Minulá výkonnost není spolehlivým ukazatelem budoucích výnosů. Od spuštění tohoto finančního nástroje neuplynulo ani pět let.

## Disclaimer

### Riziko emitenta:

Certifikát jako dluhopis na doručitele není předmětem rakouské ochrany vkladů. Pokud v případě případné platební neschopnosti není emitent schopen splnit své závazky, závazky z certifikátu, nebo je schopen pouze splnit jen částečně, mohou majitelé certifikátů přijít o podstatnou část investovaného kapitálu, nebo dokonce úplnou ztrátu. Toto riziko se často označuje také jako „riziko emitenta“ nebo „riziko úvěruschopnosti“.

### Possibility of Bail-in:

The Federal Act on the Recovery and Resolution of Banks (“BaSAG”) applies. The BaSAG regulates the possibility of the regulatory resolution of banks that have run into difficulties. Holders of certificates may be affected by such a regulatory measure with their claims to payment(s) (the so-called “bail-in”), and this may result in the loss of a substantial part of the invested capital or even a total loss for all types of certificates.

## Bonusové certifikáty

### Co byste měli zvážit před nákupem:

- **Market risk:** The price of the Bonus Certificate is dependent on the underlying's performance. An unfavourable performance of the underlying may result in price fluctuations of the certificate during the term. This may result in a partial or even total loss of the invested capital.
- **Barrier event:** If the barrier of the Bonus Certificate is touched or undercut during the term, the protection mechanism is suspended. In this case, the investor is exposed to the market risk on a one-to-one basis and a substantial capital loss is possible. The redemption at the end of the term is then usually one-to-one with the underlying performance.
- **Price performance:** During the term, the certificate's price is not only dependent on the underlying's performance but on various influencing factors such as the underlying's volatility, interest rates, issuer's solvency or remaining term. Selling the Bonus Certificate prior to maturity may result in a partial or even total loss of the invested capital.
- **Yield limitation:** Depending on the product structure, a Bonus Certificate may have a maximum payout amount (e.g. cap/ maximum amount or fixed interest amount).
- **Currency risk:** If the underlying quotes in a currency that is different and the product does not provide for currency hedging, changes in the exchange rate during the term of the Bonus Certificate will also affect the value of the certificate. This can additionally increase the loss from the Bonus Certificate due to the market risk.
- **Payouts of the underlying:** Dividends and comparable claims from the ownership of the underlying are taken into account in the certificate's structure and are not paid out.
