The certificate will be redeemed at 118% in July 2029 if the EURO STOXX 50® Index and the S&P 500® Index are always quoted above the respective barrier of 49% of the starting value throughout the term. If the barrier is violated, the certificate is redeemed according to the performance of the worse-performing index. In this case, a significant capital loss is possible.

How the certificate works

At the beginning of the term the starting values of each underlying index are fixed and the barriers are calculated on this basis. During the observation period, the underlying prices are compared with the respective barrier.

At the end of the term there are two options:

- Barrier was never touched or undercut
The certificate is redeemed at 118%.
- Barrier was touched or undercut at least once
Regardless of which index has violated the barrier, the certificate is redeemed according to the performance of the worse-performing index (final value compared to the initial value). The maximum redemption remains limited to 118% of the nominal amount.

During the term

- > You can buy and sell the certificate during trading hours at the current price.
- > If the barrier was violated, investors bear the market risk.
- > The price of the certificate is subject to various influencing factors, such as the performance of the underlyings, their volatility, correlation, dividend expectations and the interest rate level. This price may decline below the issue price, especially if at least one of the underlyings moves close to the barrier.

Legal and Risk Disclaimer for Investors

The information provided is for general information purposes only and does not constitute investment advice, a recommendation or an invitation to execute a transaction. The information is generic and does not take into account the personal circumstances of potential investors. It is therefore not a substitute for individual investor and investment advice and risk disclosure. The advertisement was not prepared in accordance with the legal requirements designed to promote the independence of investment research and is not subject to the prohibition on dealing ahead of the dissemination of investment research.

The complete legal basis for a possible transaction in a financial instrument described here is formed by the registration document approved by the Luxembourg Financial Supervisory Authority (CSSF) and the securities note approved by the Austrian Financial Market Authority (FMA) – both documents together form the base prospectus – along with any supplements and the respective final terms filed with the FMA. The approval of the base prospectus by the competent authority should not be understood as an endorsement of the financial instruments described by this authority. Additional information on the financial instrument is available free of charge in the respective key information documents (KIDs) on the website of Raiffeisen Bank International AG (RBI) after entering the security identification number (ISIN) at raiffeisencertificates.com. Unless explicitly stated in these documents, no measures have been or will be taken in any jurisdiction to allow a public offer of this financial instrument.

Issuer risk/creditor participation ('Bail-in'): All payments during the term or at the end of the term of the certificates are dependent on the solvency of RBI (issuer risk). Investors are exposed to the risk that RBI as the issuer might be unable to fulfil its payment obligations in respect of the financial instruments, e.g. in the event of insolvency (insolvency/over-indebtedness) or an official order for resolution measures by the resolution authority. The resolution authority may also issue such an order before any insolvency proceedings if RBI is judged to be in crisis. Under these circumstances the resolution authority has wide-ranging powers to take action (so-called "bail-in instruments"). Among other things, it can reduce investors' claims under the financial instruments described to zero, terminate the financial instruments described or convert them into RBI shares, and suspend investors' rights. Further detailed information is available at raiffeisenzertifikate.at/en/bail-in. A total loss of the invested capital is possible.

The information presented does not constitute binding tax advice. Tax treatment of investments is dependent on the personal situation of the investor and may be subject to change. As regards tax treatment and impact on the investor's individual tax situation, the investor is advised to consult with a tax advisor. This report is based on the knowledge the persons

preparing the document have obtained up to the date of creation. Please note that the legal situation may change due to legislative amendments, tax directives etc.

The Bonus Certificate's price is subject to several influencing factors and need not develop simultaneously to and in accordance with the underlying's performance. Such influencing factors include e.g. intensity of the underlying's price fluctuations (volatility), bond interest rates, solvency of the issuer or remaining term. If the Bonus Certificate is sold prior to the end of the term, there is a risk of incurring a partial or even total loss of the invested capital. Dividends and similar rights associated with the underlying are taken into account when structuring the Bonus Certificate and are not paid out.
