The financial instrument described herein is based on an MSCI® index.

raiffeisencertificates.com

This certificate offers a redemption of 105% at the end of the term (capital protection). Additionally, a higher repayment will occur if the index level increases by more than 5% by July 2031. The maximum repayment is 145%.

The MSCI® Europe Infrastructure, Aerospace & Defense Select 4.5% Decrement Index is the underlying for the certificate. The index comprises approximately 50 European equities from the infrastructure, aerospace and defence sectors and is calculated as a decrement index, with 4.5% p.a. deducted from the index level on an ongoing basis.

How the certificate works

At the beginning of the term the starting value of the underlying is fixed. At the end of the term, the closing price of the underlying is compared with the starting value. Then, there are two options:

1. Underlying has risen by more than 5%
The price gain is paid out 1:1. The maximum redemption of the certificate is limited to 145% of the nominal amount.
2. Underlying has fallen or risen by less than 5%
The certificate is redeemed at 105% (capital protection).

Examples of redemption

Index performance*	Redemption** at the end of the term	
+50%	145%	EUR 1,450
+25%	125%	EUR 1,250
+20%	120%	EUR 1,200
+3%	105%	EUR 1,050
+/-0% = starting value	105%	EUR 1,050
-30%	105%	EUR 1,050

* Final value compared to the starting value

** per EUR 1,000 nominal value

The payoff profile applies at maturity

- > 105% of the nominal amount is secured by the capital protection at the end of term.
- > The maximum redemption is limited to 145%.
- > Loss of value due to inflation is not covered by the capital protection.

During the term

- > You can buy and sell the certificate during trading hours at the current price.
- > The price may drop below the issue price or the level of capital protection. Selling the certificate prior to the maturity date may result in a loss of capital.

Issuer risk / Bail-in

Certificates are not covered by the Deposit Protection Scheme. Investors are exposed to the risk that Raiffeisen Bank International AG might be unable to fulfil its payment obligations in respect of the described financial instrument such as in the event of insolvency (issuer risk) or an official directive (Bail-in). MSCI® Europe Infrastructure, Aerospace & Defense Select 4.5% Decrement Index

The index serves as a benchmark for European equity investments in the infrastructure, aerospace, and defence sectors. It comprises approximately 50 constituents that are included either in the MSCI® Europe Infrastructure Index or the MSCI® Europe Aerospace & Defense Index, thereby covering companies from 12 developed European markets.

The difference to the corresponding price index variant lies in its calculation as a decrement index: in the MSCI® Europe Infrastructure, Aerospace & Defense Select 4.5% Decrement Index, distributed net dividends are reflected in the index calculation. In return, a fixed rate of 4.5% p.a. is continuously deducted from the index level (daily adjustment).

Legal and Risk Disclaimer for Investors

The information provided is for general information purposes only and does not constitute investment advice, a recommendation or an invitation to execute a transaction. The information is generic and does not take into account the personal circumstances of potential investors. It is therefore not a substitute for individual investor and investment advice and risk disclosure. The advertisement was not prepared in accordance with the legal requirements designed to promote the independence of investment research and is not subject to the prohibition on dealing ahead of the dissemination of investment research.

The complete legal basis for a possible transaction in a financial instrument described here is formed by the registration document approved by the Luxembourg Financial Supervisory Authority (CSSF) and the securities note approved by the Austrian Financial Market Authority (FMA) – both documents together form the base prospectus – along with any supplements and the respective final terms filed with the FMA. The approval of the base prospectus by the competent authority should not be understood as an endorsement of the financial instruments described by this authority. Additional information on the financial instrument is available free of charge in the respective key information documents (KIDs) on the website of Raiffeisen Bank International AG (RBI) after entering the security identification number (ISIN) at raiffeisencertificates.com. Unless explicitly stated in these documents, no measures have been or will be taken in any jurisdiction to allow a public offer of this financial instrument.

Issuer risk/creditor participation ('Bail-in'): All payments during the term or at the end of the term of the certificates are dependent on the solvency of RBI (issuer risk). Investors are exposed to the risk that RBI as the issuer might be unable to fulfil its payment obligations in respect of the financial instruments, e.g. in the event of insolvency (insolvency/over-indebtedness) or an official order for resolution measures by the resolution authority. The resolution authority may also issue such an order before any insolvency proceedings if RBI is judged to be in crisis. Under these circumstances the resolution authority has wide-ranging powers to take action (so-called "bail-in instruments"). Among other things, it can reduce investors' claims under the financial instruments described to zero, terminate the financial instruments described or convert them into RBI shares, and suspend investors' rights. Further detailed information is available at raiffeisenzertifikate.at/en/bail-in. A total loss of the invested capital is possible.

The information presented does not constitute binding tax advice. Tax treatment of investments is dependent on the personal situation of the investor and may be subject to change. As regards tax treatment and impact on the investor's individual tax situation, the investor is advised to consult with a tax advisor. This report is based on the knowledge the persons

preparing the document have obtained up to the date of creation. Please note that the legal situation may change due to legislative amendments, tax directives etc.

The price of the Certificate is dependent on the underlying's price. Adverse performances of the underlying may cause price fluctuations of the Certificate during the term. If the Certificate is sold prior to the end of the term, there is the risk to incur a substantial loss of the invested capital ("market risk"). The capital protection of 105% of the nominal value applies solely at the end of the term. Loss of value due to inflation is not covered by the capital protection. During the term, the price of the Certificate may drop below the agreed capital protection amount. During the term, the Certificate's price is subject to several influencing factors and needs not develop simultaneously to and in accordance with the underlying's performance. Such influencing factors include e.g. intensity of the underlying's price fluctuations (volatility), interest rates, solvency of the issuer or remaining term. If the Capital Protection Certificate is sold prior to the end of the term, there is the risk to incur a partial loss of the invested capital. Dividends and similar rights associated with the underlying are taken into account when structuring the Certificate and are not paid out.
