DESCRIPTION

With the certificate **3% Europe/Gold Bonus&Safety 2** investors obtain an annual fixed interest rate of 3% during the five year term. Redemption at the end of the term (May 2026) depends on the performance of the EURO STOXX 50® index and the gold price: the certificate is redeemed at 100% (equivalent to EUR 1,000 per nominal value) provided that the two underlyings never decline by 51% or more of the respective starting value during the observation period.

If the underlyings touch or undercut the barrier of 49% of the respective starting value (51% safety buffer), redemption will be effected according to the performance of the worst performing underlying. The opportunity for yields is in any case limited to the annual fixed interest rate.

INVESTMENT WITH FIXED INTEREST RATE

In short:

The 3% Europe/Gold Bonus&Safety 2 certificate enables investors to obtain a fixed interest rate of 3% annually. At the end of the term, redemption is effected at 100% provided that the daily closing price of the EURO STOXX 50® index and the daily LBMA Gold Afternoon Fixing Price always quote above the barrier of 49% of their respective starting value during the observation period. In the event of a barrier violation by at least one of the underlyings, investors are exposed one to one to market risk. This means that a substantial loss of capital is possible.

The certificate **3% Europe/Gold Bonus&Safety 2** is based on the best-known equity benchmark index in the euro zone, the EURO STOXX 50® index and the gold price. This investment product is suited for investors who expect these two underlyings to perform stably in the upcoming five years and who deem price slumps of 51% or more unlikely to occur. The certificate combines fixed interest payments of 3% p.a. with partial protection for the invested capital. The initial distance to the barrier (safety buffer) is 51%. The certificate has a term of five years. Further details regarding opportunities and risks of this certificate are presented on the following page.

FUNCTIONALITY

At the initial valuation date, the closing price of the **EURO STOXX 50® index** and the **LBMA Gold Afternoon Fixing Price** (03:00 p.m. London) are fixed as **starting values** and the respective **barriers** (49% of the respective starting value) are determined.

- The **fixed interest rate** of 3% is paid out annually, regardless of the performance of the two underlyings (equivalent to 5x EUR 30 per nominal value during the term).
- **Redemption** of the nominal value at the end of the term depends on the performance of the two underlyings. The closing price of the EURO STOXX 50® index and the LBMA Gold Afternoon Fixing Price (03:00 p.m. London) are compared daily with the respective barrier. At the final valuation date **one of the following scenarios** will apply:

SCENARIO 1: both underlyings always quoted ABOVE their respective barrier

If the daily closing price of the EURO STOXX 50® index **AND** the daily closing price of the LBMA Gold Afternoon Fixing Price (03:00 p.m. London) always quoted above the barrier of 49% of their respective starting value during the observation period, the certificate is redeemed at 100%. This means, provided that none of the two underlyings ever closes 51% or more below its respective starting value, investors obtain the nominal value of EUR 1,000 at the maturity date. This amount represents the maximum payout.

SCENARIO 2: barrier TOUCHED or UNDERCUT by at least one underlying

If the daily closing price of the EURO STOXX 50® index **AND/OR** the daily closing price of the LBMA Gold Afternoon Fixing Price (03:00 p.m. London) touched or undercut the barrier of 49% of the respective starting value during the observation period, redemption at the maturity date is effected according to the underlying which performs "worst" (percentage change from the starting value to the closing price at the final valuation date). Even if the barrier is touched or undercut, the maximum payout is limited to EUR 1,000 per nominal value and investors do not participate in price increases of the underlyings beyond their starting values.

EURO STOXX 50® INDEX

The EURO STOXX 50® is the leading blue-chip index for the Eurozone. It comprises 50 major listed companies from eight eurozone countries. STOXX Ltd. continuously updates the index value.

The **current level** of the EURO STOXX 50® index at 3,919.21 (closing price) as of March 31, 2021 would result in a barrier of 1,920.41 (equals 49% of 3,919.21).

GOLD (London Afternoon Fixing)

Since ancient times, gold has been appreciated as a major means of payment and a store of value. Especially in uncertain times, investors consider gold a safe haven. The gold price is determined twice a day. The p.m. fixing is relevant for the observation of the barrier.

Considering the current **LBMA Gold Afternoon Fixing Price** as of March 31, 2021 at 1,691.05, the barrier would be at 828.61 (49 % of 1,691.05).

NO CURRENCY RISK

The p.m. fixing of the gold price is carried out in USD. The 3% Europe/Gold Bonus&Safety 2 certificate is 100% currency hedged - the EUR/USD exchange rate has no influence on the performance of the certificate.

NOTE

The referenced opportunities and risks represent a selection of the most important facts regarding the product.

You are about to purchase a product that is not easy and difficult to understand.

For further information see the Base Prospectus (including possible amendments) – approved by the Austrian Financial Market Authority (FMA), deposited at the Oesterreichische Kontrollbank AG and published at www.rcb.at/en/securitiesprospectus (we recommend reading the prospectus before making an investment decision), in the key information document and among „Customer Information and Regulatory Issues“ at www.rcb.at/en/customerinformation

OPPORTUNITIES

- **Fixed interest rate:**
The fixed annual interest rate (3% p.a.) is paid out regardless of the performance of the two underlyings.
- **Safety buffer:**
Attractive yield in sideways moving and moderately declining markets due to the partial protection against falling prices down to the barrier of 49% (safety buffer of 51%)
- **Flexibility:**
Tradability on the secondary market, no management fees

RISKS

- **Barrier violation:**
If the respective barrier is violated by at least one of the two underlyings, investors are entirely subject to market risk, without any protective mechanism.
- **Limited yield opportunity:**
The yield is in any case limited to the fixed annual interest payments (5 x 3% during the term). Investors do not participate in price increases of the underlyings beyond their starting values.
- **Issuer risk / Bail-in:**
Certificates are not covered by the Deposit Protection Scheme. Investors are exposed to the risk that Raiffeisen Centrobank AG might be unable to fulfil its payment obligations in respect of the described financial instrument such as in the event of insolvency (issuer risk) or an official directive (Bail-in). A total loss of the capital invested is possible.

DISCLAIMER

In spite of all possible care taken, the data contained in this advertisement are provided purely as non-binding information. This advertisement constitutes neither investment advice nor, an offer nor a recommendation nor an invitation to execute a transaction. The information contained in this advertisement is generic and no consideration is given to the personal circumstances of potential investors. The information contained in this advertisement substitutes neither the necessary individual investment advice for the purchase or sale of investments nor shall any investment decision be taken on the basis of this document. This advertisement has not been prepared in accordance with legal requirements designed to promote the independence of investment research and is not subject to the prohibition on dealing ahead of the dissemination of investment research.

The complete information for all financial instruments described in this advertisement as well as the sole legal basis for potential transactions in one of the described financial instruments is the Base Prospectus (including any possible supplements) which has been approved by the Austrian Financial Market Authority (FMA) in connection with the corresponding Final Terms of the described financial instruments. The approved Base Prospectus (including any possible supplements) and the respective Final Terms have been deposited at the Oesterreichische Kontrollbank AG as the notification office. The approval of the Base Prospectus should not be construed as an endorsement of the financial instrument described herein by the FMA. Additional information on the financial instruments described herein may also be obtained from the respective key information documents (KIDs) that are available for download free of charge on the website of Raiffeisen Centrobank AG (www.rcb.at) by entering the International Securities Identification Number (ISIN) of the respective financial instrument. Unless otherwise explicitly expressed in any of the cited documents above, no measures have been taken in any national legal system which should permit a public offering of the products described therein. Raiffeisen Centrobank AG explicitly excludes any liability in relation to the correctness, appropriateness and completeness of the information presented herein. Certificates are risky instruments of wealth investment. Should the price of the respective underlying instrument of a certificate develop adversely, an investor may lose part or all of his or her invested capital. Certificates react more strongly or weakly to changes of the price of the underlying instrument depending on a number of factors (e.g. volatility or correlation of the underlying instruments, interest, dividends, remaining term, changes in foreign exchange rates) and do not move simultaneously with the underlying. Under certain circumstances the issuer is authorized to redeem the certificates prior to the agreed repayment date.

Issuer Risk/Creditor Participation ("bail-in"): Any payments during or at the end of the term of the certificates depend on the solvency of the issuer ("issuer risk"). Investors are therefore exposed to the risk that Raiffeisen Centrobank AG might be unable to fulfil its payment obligations in respect of the described financial instrument such as in the event of insolvency ("issuer risk") or an official directive ("bail-in"). The resolution authority may also issue such an order before any insolvency proceedings if the issuer is judged to be in crisis. Under these circumstances the resolution authority has wide-ranging powers to take action (so-called "bail-in instruments"). For example, it can reduce the claims of investors in respect of the described financial instruments to zero, terminate the described financial instruments, or convert them into shares of the issuer and suspend investors' rights. More detailed further information is available at www.rcb.at/en/basag. A total loss of the invested capital is possible. Past performance is no reliable indicator of future results. Please refer to the Base Prospectus for additional disclosures on risks as well as further information. The information presented does not constitute binding tax advice. Tax treatment of investments is dependent on the personal situation of the investor and may be subject to change. As regards tax treatment and impact on the investor's individual tax situation, the investor is advised to consult with a tax advisor. This report is based on the knowledge the persons preparing the document have obtained up to the date of creation. Please note that the legal situation may change due to legislative amendments, tax directives, opinions of financial authorities, jurisdiction etc.

The Bonus Certificate's price is subject to several influencing factors and need not develop simultaneously to and in accordance with the underlying's performance. Such influencing factors include e.g. intensity of the underlying's price fluctuations (volatility), bond interest rates, solvency of the issuer or remaining term. If the Bonus Certificate is sold prior to the end of the term, there is the risk to incur a partial or even total loss of the invested capital. Dividends and similar rights associated with the underlying are taken into account when structuring the Bonus Certificate and are not paid out.
