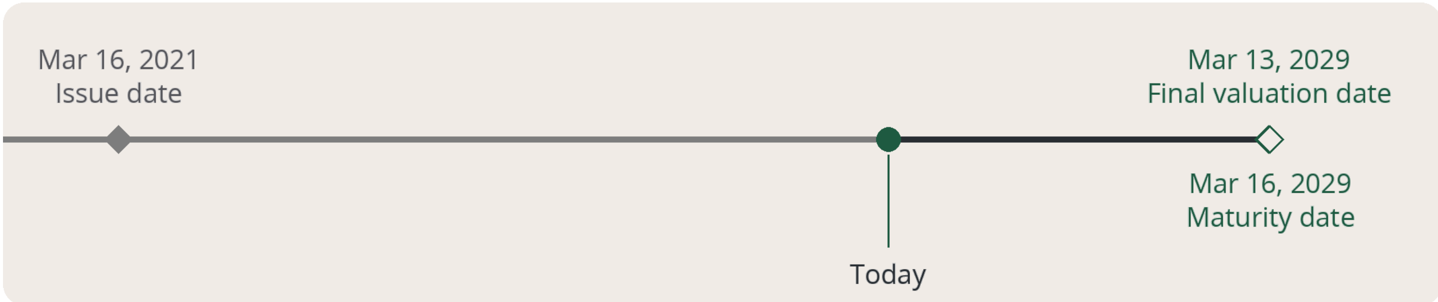
The Certificate

Capital Protection Certificates enable investors to invest into an underlying such as shares, indices, commodities etc. and to be capital protected at the end of the term. Investors obtain either interest payments or participate in the performance of the underlying.

Information on the term



Please note:

- 90% of the nominal amount is secured by capital protection at the end of the term. During the term, the price may fall below the issue price or the capital protection level. Selling the capital protection certificate before the end of the term may lead to a loss of part of the invested capital.
- The maximum repayment is limited to 100% + 32% (of the nominal amount).
- Loss of purchasing power due to inflation is not offset by the capital protection.

Issuer risk / creditor participation: Certificates are not covered by the deposit protection system. There is a risk that Raiffeisen Bank International AG may not be able to meet its payment obligations due to insolvency (issuer risk) or any official orders ("bail-in"). In such cases, the invested capital may be lost in full.

After the slump in the last year, the global stock market has seen a strong growth thanks to positive news about the COVID-19 virus vaccine. The optimistic outlook of economists in case of the expected economic recovery may strengthen this trend in the upcoming period. Therefore, many investors have become interested in investing in the stock market, but may still be averse to the full market risk. **Premium Protected Certificate 90% III** can be the solution to this dilemma.

FUNCTIONALITY

At the initial valuation date, the starting value of the STOXX® Global Select Dividend 100 index is determined (closing price as of 15.03.2021).

At the end of the term, the performance of the STOXX® Global Select Dividend 100 index is evaluated. This means at the final valuation date (13.03.2029) the index closing price is compared to the starting value. Investors participate 1:1 in the performance of the underlying index up to a maximum of +32% of the starting value. Thus, the maximum coupon amount is limited to EUR 320 per nominal value of EUR 1.000. Investors also participate in a slight decline of the index up to a maximum of -10%. In case of a negative performance of the underlying index of more than -10%, the capital protection of 90% applies.
