### The Certificate

With the certificate MSCI Emerging Markets Sustainability Bond 90%, investors achieve a return of 28% if the price of the MSCI<sup>®</sup> Emerging Markets TOP ESG Select 5% Decrement Index quotes at/ above 108% of the starting value at the end of the term. If the index quotes below 108% but at/above 100% of the starting value at the end of the term, redemption is effected at 108% of the nominal value. If the index declines by up to -10%, the redemption is effected at 100% of the nominal value. In case of a negative price performance of more than -10%, the 90% capital protection applies at the end of the term.

Details on the index can be found on [the website of the index provider MSCI](#) by selecting the respective index in the dropdown menu. This certificate complies with the [sustainability standard for Raiffeisen Certificates](#) and takes into account important adverse impacts on sustainability factors ("PAIs").

### Sustainability

This certificate complies with the sustainability standard for Raiffeisen Certificates.

## Information on the term

Please note:

- 90% of the nominal amount is secured by capital protection at the end of the term. During the term, the price may fall below the issue price or the capital protection level. Selling the capital protection certificate before the end of the term may lead to a loss of part of the invested capital.
- The maximum repayment is limited to 128% (of the nominal amount).
- Loss of purchasing power due to inflation is not offset by the capital protection.

Issuer risk / creditor participation: Certificates are not covered by the deposit protection system. There is a risk that Raiffeisen Bank International AG may not be able to meet its payment obligations due to insolvency (issuer risk) or any official orders ("bail-in"). In such cases, the invested capital may be lost in full.

Notes:

### FUNCTIONALITY

At the initial valuation date the closing price of the MSCI® Emerging Markets Top ESG Select 5% Decrement Index is determined as **starting value**. At the final valuation date the closing price of the index is compared to the starting value and **one of the following scenarios will apply**:

#### SCENARIO 1: Index ON/ABOVE 90% of the starting value

##### A) Index $\geq$ 108% of the starting value → redemption of 128%

If the closing price of the index at the final valuation date is equal to or higher than 108% of the starting value, the redemption at the maturity date will be at 128% of the nominal value. This equals the maximum amount of EUR 1,280 per nominal value.

##### B) Index $\geq$ 100% and $<$ 108% of the starting value → redemption of 108%

If the closing price of the index at the final valuation date is less than 108% but at least 100% of the starting value, the redemption at the maturity date will be 108% of the nominal value. This equals EUR 1,080 per nominal value.

##### C) Index $\geq$ 90% and $<$ 100% of the starting value → redemption of 100%

If the closing price of the index at the final valuation date is less than 100% but at least 90% of the starting value, the redemption at the maturity date will be 100% of the nominal value. This equals EUR 1,000 per nominal value.

#### SCENARIO 2: Index UNDER 90% of the starting value

If the closing price of the index at the final valuation date is below 90% of the starting value, the capital protection will apply and the certificate will be redeemed at the maturity date at 90% of the nominal value (equivalent to EUR 900 per nominal value).

#### COUNTRY WEIGHTING

#### OPPORTUNITIES

- **Return opportunity:** Investors can already achieve a return if the price of the index remains constant.
- **Capital protection:** The certificate is 90% capital protected at the end of the term, i.e. at the end of the term the investor obtains at least 90% of the nominal value.
- **Flexibility:** Tradability on the secondary market, no management fees

#### RISKS

- **Limited yield opportunity:** The maximum payout is limited to EUR 1,280 nominal value, investors do not participate in price increases of the index beyond the cap of 128% of the starting value.
- **Capital protection only at the end of the term:** During the term the price of the certificate may drop below 90%; the capital protection applies exclusively at the end of the term. Loss of value due to inflation is not covered by the capital protection.
- **Issuer risk / Bail-in:** Certificates are not covered by the Deposit Protection Scheme. Investors are exposed to the risk that Raiffeisen Centrobank AG might be unable to fulfil its payment obligations in respect of the described financial instrument such as in the event of insolvency (issuer risk) or an official directive (Bail-in). A total loss of the capital invested is possible.

**DISCLAIMER**

In spite of all possible care taken, the data contained in this advertisement are provided purely as non-binding information. This advertisement constitutes neither investment advice nor an offer nor a recommendation nor an invitation to execute a transaction. The information contained in this advertisement is generic and no consideration is given to the personal circumstances of potential investors. The information contained in this advertisement substitutes neither the necessary individual investment advice for the purchase or sale of investments nor shall any investment decision be taken on the basis of this document. This advertisement has not been prepared in accordance with legal requirements designed to promote the independence of investment research and is not subject to the prohibition on dealing ahead of the dissemination of investment research.

The complete information for all financial instruments described in this advertisement as well as the sole legal basis for potential transactions in one of the described financial instruments is the Base Prospectus (including any possible supplements) which has been approved by the Austrian Financial Market Authority (FMA) in connection with the corresponding Final Terms of the described financial instruments. The approved Base Prospectus (including any possible supplements) and the respective Final Terms have been deposited at the Oesterreichische Kontrollbank AG as the notification office. The approval of the Base Prospectus should not be construed as an endorsement of the financial instrument described herein by the FMA. Additional information on the financial instruments described herein may also be obtained from the respective key information documents (KIDs) that are available for download free of charge on the website of Raiffeisen Centrobank AG ([www.rcb.at](http://www.rcb.at)) by entering the International Securities Identification Number (ISIN) of the respective financial instrument. Unless otherwise explicitly expressed in any of the cited documents above, no measures have been taken in any national legal system which should permit a public offering of the products described therein. Raiffeisen Centrobank AG explicitly excludes any liability in relation to the correctness, appropriateness and completeness of the information presented herein.

Certificates are risky instruments of wealth investment. Should the price of the respective underlying instrument of a certificate develop adversely, an investor may lose part or all of his or her invested capital. Certificates react more strongly or weakly to changes of the price of the underlying instrument depending on a number of factors (e.g. volatility or correlation of the underlying instruments, interest, dividends, remaining term, changes in foreign exchange rates) and do not move simultaneously with the underlying. Under certain circumstances the issuer is authorized to redeem the certificates prior to the agreed repayment date.

Issuer Risk/Creditor Participation ("bail-in"): Any payments during or at the end of the term of the certificates depend on the solvency of the issuer ("issuer risk"). Investors are therefore exposed to the risk that Raiffeisen Centrobank AG might be unable to fulfil its payment obligations in respect of the described financial instrument such as in the event of insolvency ("issuer risk") or an official directive ("bail-in"). The resolution authority may also issue such an order before any insolvency proceedings if the issuer is judged to be in crisis. Under these circumstances the resolution authority has wide-ranging powers to take action (so-called "bail-in instruments"). For example, it can reduce the claims of investors in respect of the described financial instruments to zero, terminate the described financial instruments, or convert them into shares of the issuer and suspend investors' rights. More detailed further information is available at [www.rcb.at/en/basag](http://www.rcb.at/en/basag). A total loss of the invested capital is possible.

Past performance is no reliable indicator of future results. Please refer to the Base Prospectus for additional disclosures on risks as well as further information. The information presented does not constitute binding tax advice. Tax treatment of investments is dependent on the personal situation of the investor and may be subject to change. As regards tax treatment and impact on the investor's individual tax situation, the investor is advised to consult with a tax advisor. This report is based on the knowledge of the persons preparing the document have obtained up to the date of creation. Please note that the legal situation may change due to legislative amendments, tax directives, opinions of financial authorities, jurisdiction etc.

The price of the Capital Protection Certificate is dependent on the underlying's price. Adverse performances of the underlying may cause price fluctuations of the Certificate during the term. If the Capital Protection Certificate is sold prior to the end of the term, there is the risk to incur a substantial loss of the invested capital ("market risk"). The capital protection of 90% of the nominal value applies solely at the end of the term. During the term, the price of the Capital Protection Certificate may drop below the agreed capital protection amount. During the term, the Capital Protection Certificate's price is subject to several influencing factors and needs not develop simultaneously to and in accordance with the underlying's performance. Such influencing factors include e.g. intensity of the underlying's price fluctuations (volatility), interest rates, solvency of the issuer or remaining term. If the Capital Protection Certificate is sold prior to the end of the term, there is the risk to incur a partial loss of the invested capital. Dividends and similar rights associated with the underlying are taken into account when structuring the Capital Protection Certificate and are not paid out.
