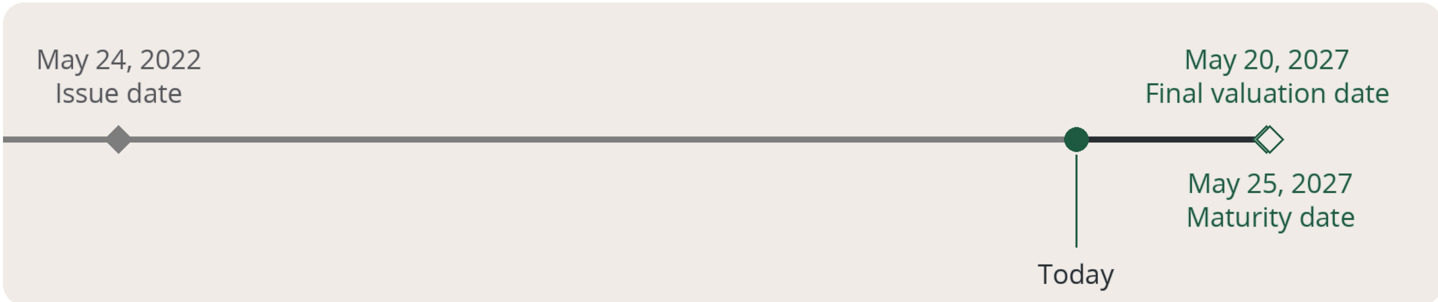
Information on the term



Please note:

- Loss of purchasing power due to inflation is not offset by the capital protection.

Issuer risk / creditor participation: Certificates are not covered by the deposit protection system. There is a risk that Raiffeisen Bank International AG may not be able to meet its payment obligations due to insolvency (issuer risk) or any official orders ("bail-in"). FUNCTIONALITY

At the initial valuation date, the starting value of the MSCI® World Top ESG Select 4.5% Decrement Index is determined (closing price as of 23.05.2022).

At the end of the term, the performance of the MSCI® World Top ESG Select 4.5% Decrement Index is evaluated. This means that at the final valuation date (20.05.2027) the index closing price is compared to the starting value. Investors participate 1:1 in the performance of the underlying index up to a maximum of +35% of the starting value. Thus, the maximum coupon amount is limited to EUR 350 per nominal value of EUR 1.000. Investors also participate in a slight decline of the index up to a maximum of -5%. In case of a negative performance of the underlying index of more than -5%, the capital protection of 95% applies.

PERMANENT LIQUIDITY

The term of the certificate is 5 years. Raiffeisen Centrobank provides permanent liquidity for the certificate during the whole term. This means it is possible to sell the certificate at current market price anytime before the maturity date.

95% CAPITAL PROTECTION

At the end of the term the investment is 95% capital protected, i.e. during the term price fluctuations of the certificate may occur and the certificate price may drop below 95%, but at the end of the term the investor obtains 95% of the nominal value in any case.

At the final valuation date **one of the following scenarios applies:**

SCENARIO 1: Index performance is POSITIVE

At the end of the term the increase in the index price from the starting value to the closing price at the final valuation date up to a maximum of +35% is paid out as a coupon in addition to the nominal value (max. EUR 350 per nominal value of EUR 1,000).

SCENARIO 2: Index performance remains UNCHANGED or is NEGATIVE

Investors also participate in a decline of the index up to a maximum of -5%. In case of a negative index performance of more than -5%, the capital protection of 95% applies (equals EUR 950 per nominal value of EUR 1,000). No coupon is paid out in this scenario.

EXAMPLE: REDEMPTION AT THE END OF THE TERM

INDEX PERFORMANCE		MECHANISM	NOM. VALUE	COUPON	TOTAL*

Certificates are risky instruments of wealth investment. Should the price of the respective underlying instrument of a certificate develop adversely, an investor may lose part or all of his or her invested capital. Certificates react more strongly or weakly to changes of the price of the underlying instrument depending on a number of factors (e.g. volatility or correlation of the underlying instruments, interest, dividends, remaining term, changes in foreign exchange rates) and do not move simultaneously with the underlying. Under certain circumstances the issuer is authorized to redeem the certificates prior to the agreed repayment date.

Issuer Risk/Creditor Participation ("bail-in"): Any payments during or at the end of the term of the certificates depend on the solvency of the issuer ("issuer risk"). Investors are therefore exposed to the risk that Raiffeisen Centrobank AG might be unable to fulfil its payment obligations in respect of the described financial instrument such as in the event of insolvency ("issuer risk") or an official directive ("bail-in"). The resolution authority may also issue such an order before any insolvency proceedings if the issuer is judged to be in crisis. Under these circumstances the resolution authority has wide-ranging powers to take action (so-called "bail-in instruments"). For example, it can reduce the claims of investors in respect of the described financial instruments to zero, terminate the described financial instruments, or convert them into shares of the issuer and suspend investors' rights. More detailed further information is available at www.rcb.at/en/basag. A total loss of the invested capital is possible. Past performance is no reliable indicator of future results. Investment certificates do not constitute bank deposits and are not covered by a deposit protection scheme. Please refer to the Base Prospectus for additional disclosures on risks as well as further information. The information presented does not constitute binding tax advice. Tax treatment of investments is dependent on the personal situation of the investor and may be subject to change. As regards tax treatment and impact on the investor's individual tax situation, the investor is advised to consult with a tax advisor. This report is based on the knowledge the persons preparing the document have obtained up to the date of creation. Please note that the legal situation may change due to legislative amendments, tax directives, opinions of financial authorities, jurisdiction etc.

The Certificate's price is subject to several influencing factors and need not develop simultaneously to and in accordance with the underlying's performance. Such influencing factors include e.g. intensity of the underlying's price fluctuations (volatility), bond interest rates, solvency of the issuer or remaining term. If the Certificate is sold prior to the end of the term, there is the risk to incur a partial or even total loss of the invested capital. The capital protection applies solely at the end of the term. Dividends and similar rights associated with the underlying are taken into account when structuring the Certificate and are not paid out.

The MSCI indices are the exclusive property of MSCI Inc. ("MSCI"). MSCI and the MSCI index names are service mark(s) of MSCI or its affiliates and have been licensed for use for certain purposes by Raiffeisen Centrobank AG. The financial securities referred to herein are not sponsored, endorsed or promoted by MSCI, and MSCI bears no liability with respect to any such financial securities. Exchange of a variable real dividends for a fixed dividend in the index calculation allows to structure more attractive certificates with better conditions for the investor. The dividends described herein associated with the underlying are taken into account when structuring the certificate and are not paid out (neither to the issuer nor to the distributor nor to the investor).
