Description

With the certificate **Europe Inflation Bonus&Safety 19** investors receive an annual interest rate consisting of two components: 2.5% fixed interest rate plus the euro area inflation rate. The nominal amount is repaid at 100% if the EURO STOXX 50® index always quotes above the barrier of 49% of its starting value during the term. In the event of a barrier violation, investors are exposed to market risk on a one-to-one basis. In this case, a substantial capital loss is possible.

Details on the index can be found on [the website of the index provider STOXX](#)

Price certificate (% of the starting value)

Europe Inflation Bonus&Safety 19

- Underlying: EURO STOXX 50® Index
- 2.5% fixed annual interest rate + additional interest rate in the amount of the annual inflation (HICP excluding tobacco)
- Barrier at 49% of the starting value
- Full market risk if barrier is violated, issuer risk
- Further information on opportunities/risks on the following pages
- Term of 3 years

EURO STOXX 50® is a registered trademark of STOXX Ltd.

Investment product without capital protection
Bonus Certificate

With the certificate, investors receive an annual interest rate consisting of two components: 2.5% fixed annual interest rate plus the euro area inflation rate. At the end of the term, redemption is effected at 100% provided that the closing price of the EURO STOXX 50® index always quotes above the barrier of 49% of the starting value during the observation period. In the event of a barrier violation by the underlying, investors are exposed one to one to market risk. This means that a substantial loss of capital is possible.

How the certificate works

At the initial valuation date, the initial value of the underlying is determined and the barrier is defined on this basis. The underlying price is compared with the barrier during the observation period. At the final valuation date one of the following scenarios will apply:

1. Barrier not touched or undercut
If the underlying price was always above the barrier, 100% of the nominal value is paid out on the maturity date. This amount represents the maximum payout.
2. Barrier touched or undercut at least once
If the price of the underlying was at least once at or below the barrier, the payout on the maturity date is made in accordance with the performance of the underlying (percentage change from the starting value to the closing price at the final valuation date). The maximum payout amount remains limited to 100 % of the nominal value.

The fixed interest rate is paid in any case, regardless of the underlying performance. In addition, you will receive the extra interest rate equal to the annual inflation rate (euro area HICP excluding tobacco). In the event of a negative inflation rate (deflation), only the fixed interest rate is paid out.

Example for the calculation of the interest rate

| Year | Fixed interest rate | + | Additional interest* | = | Total interest |
|------|---------------------|---|----------------------|---|----------------|
| 2021 | 2.5% | | 1.26% | | 3.76% |
| 2022 | 2.5% | | 7.57% | | 10.07% |
| 2023 | 2.5% | | 6.91% | | 9.41% |

Note

The referenced opportunities and risks represent a selection of the most important facts regarding the product.

You are about to purchase a product that is not easy and difficult to understand.

For further information, please refer to the base prospectus (including any supplements) approved by the competent authorities - published at raiffeisenzertifikate.at/en/securities-prospectus/ (we recommend reading the prospectus before making an investment decision) - and to the base information sheets as well as to "Customer information and regulatory matters" raiffeisenzertifikate.at/customer-information

Euroregion HICP - Total index excluding tobacco

The harmonized consumer price index reflects the change in the general price level of the euro region. The calculation of the HICP provides an overview of the inflation for the euro region as a whole. It thus serves the European Central Bank to monitor price stability in the context of price stability as part of its monetary policy. The ECB defines price stability on the basis of the annual rate of change in the HICP for the currency area. For the certificate, the HICP excluding tobacco is used.

Opportunities

- Interest rate: The annual interest rate is paid out regardless of the performance of the underlying
- Safety buffer: Partial protection against price losses through the initial safety buffer of 51% - barrier at 49% of the starting value
- Flexibility: Tradability on the secondary market, no management fees

Risks

- Limited yield opportunity: The yield is in any case limited to the fixed annual interest payments. Investors do not participate in price increases of the underlyings beyond their starting values.
- Barrier violation: If the respective barrier is violated, investors are entirely subject to market risk, without any protective mechanism. Close to the barrier, disproportionate price movements of the certificate may also occur during the term.
- Issuer risk / Bail-in: Certificates are not covered by the Deposit Protection Scheme. Investors are exposed to the risk that Raiffeisen Bank International AG might be unable to fulfil its payment obligations in respect of the described financial instrument such as in the event of insolvency (issuer risk) or an official directive (Bail-in). A total loss of the capital invested is possible.

DISCLAIMER

In spite of all possible care taken, the data contained in this advertisement are provided purely as non-binding information. This advertisement constitutes neither investment advice nor an offer nor a recommendation nor an invitation to execute a transaction. The information contained in this advertisement is generic and no consideration is given to the personal circumstances of potential investors. The information contained in this advertisement substitutes neither the necessary individual investment advice for the purchase or sale of investments nor shall any investment decision be taken on the basis of this document. This advertisement has not been prepared in accordance with legal requirements designed to promote the independence of investment research and is not subject to the prohibition on dealing ahead of the dissemination of investment research.

The complete information for all financial instruments described in this advertisement as well as the sole legal basis for potential transactions in one of the described financial instruments is the Registration Document approved by the Luxembourg Financial Market Authority (CSSF) and the Securities Note approved by the Austrian Financial Market Authority (FMA) - both documents together form the Base Prospectus - together with any supplements and the respective Final Terms of the described financial instrument filed with the FMA. The approval of the Base Prospectus should not be construed as an endorsement of the financial instrument described herein by the competent authorities. Additional information on the financial instruments described herein may also be obtained from the respective key information documents (KIDs) that are available for download free of charge on the website of Raiffeisen Bank International AG (raiffeisenzertifikate.at/en) by entering the International Securities Identification Number (ISIN) of the respective financial instrument. Unless otherwise explicitly expressed in any of the cited documents above, no measures have been taken in any national legal system which should permit a public offering of the products described therein. Raiffeisen Bank International AG explicitly excludes any liability in relation to the correctness, appropriateness and completeness of the information presented herein. Certificates are risky instruments of wealth investment. Should the price of the respective underlying instrument of a certificate develop adversely, an investor may lose part or all of his or her invested capital. Certificates react more strongly or weakly to changes of the price of the underlying instrument depending on a number of factors (e.g. volatility or correlation of the underlying instruments, interest, dividends, remaining term, changes in foreign exchange rates) and do not move simultaneously with the underlying. Under certain circumstances the issuer is authorized to redeem the certificates prior to the agreed repayment date.

Issuer Risk/Creditor Participation ("bail-in"): Any payments during or at the end of the term of the certificates depend on the solvency of the issuer ("issuer risk"). Investors are therefore exposed to the risk that Raiffeisen Bank International AG might be unable to fulfil its payment obligations in respect of the described financial instrument such as in the event of insolvency ("issuer risk") or an official directive ("bail-in"). The resolution authority may also issue such an order before any insolvency proceedings if the issuer is judged to be in crisis. Under these circumstances the resolution authority has wide-ranging powers to take action (so-called "bail-in instruments"). For example, it can reduce the claims of investors in respect of the described financial instruments to zero, terminate the described financial instruments, or convert them into shares of the issuer and suspend investors' rights. More detailed further information is available at raiffeisenzertifikate.at/en/basag. A total loss of the invested capital is possible. Past performance is no reliable indicator of future results. Please refer to the Base Prospectus for additional disclosures on risks as well as further information.

The information presented does not constitute binding tax advice. Tax treatment of investments is dependent on the personal situation of the investor and may be subject to change. As regards tax treatment and impact on the investor's individual tax situation, the investor is advised to consult with a tax advisor. This report is based on the knowledge the persons preparing the document have obtained up to the date of creation. Please note that

the legal situation may change due to legislative amendments, tax directives, opinions of financial authorities, jurisdiction etc.

The Bonus Certificate's price is subject to several influencing factors and need not develop simultaneously to and in accordance with the underlying's performance. Such influencing factors include e.g. intensity of the underlying's price fluctuations (volatility), bond interest rates, solvency of the issuer or remaining term. If the Bonus Certificate is sold prior to the end of the term, there is the risk to incur a partial or even total loss of the invested capital. Dividends and similar rights associated with the underlying are taken into account when structuring the Bonus Certificate and are not paid out.

The EURO STOXX 50® index, which is used under license, is the intellectual property (including registered trademarks) of STOXX Limited, Zurich, Switzerland ("STOXX"), Deutsche Börse Group or its licensors. The Europe Inflation Bonus&Safety 19 certificate is neither sponsored nor promoted, distributed or in any other manner supported by STOXX, Deutsche Börse Group or their licensors, research partners or data providers and STOXX, Deutsche Börse Group and their licensors, research partners or data providers do not give any warranty, and exclude any liability (whether in negligence or otherwise) with respect thereto generally or specifically in relation to any errors, omissions or interruptions in the EURO STOXX 50® index or its data. Further detailed information on this matter may also be found in the Base Prospectus at "Underlying Specific Disclaimer".

The financial instrument and the associated product documents may not be offered, sold, resold or delivered or published, either directly or indirectly, to natural or legal persons who are resident/registered office in a country in which this is prohibited by law. In no event may this document be distributed in the United States of America ("U.S.A.")/to U.S. persons and the United Kingdom ("U.K.").
