End of the term	16D

Last update: Jun 12, 2026, 7:59 pm

The Certificate

Capital Protection Certificates enable investors to invest into an underlying such as shares, indices, commodities etc. and to be capital protected at the end of the term. Investors obtain either interest payments or participate in the performance of the underlying.

Information on the term

Please note:

- 100% of the nominal amount is secured by capital protection at the end of the term. During the term, the price may fall below the issue price or the capital protection level. Selling the capital protection certificate before the end of the term may lead to a loss of part of the invested capital.
- The maximum repayment is limited to 110% (of the nominal amount).
- Loss of purchasing power due to inflation is not offset by the capital protection.

Issuer risk / creditor participation: Certificates are not covered by the deposit protection system. There is a risk that Raiffeisen Bank International AG may not be able to meet its payment obligations due to insolvency (issuer risk) or any official orders ("bail-in"). In such cases, the invested capital may be lost in full.

Notes:

You are about to purchase a product that is not easy and difficult to understand. For further information see the Base Prospectus (including possible amendments) – approved by the Austrian Financial Market Authority (FMA), deposited at the Oesterreichische Kontrollbank AG and published at www.raiffeisenzertifikate.at/en/securitiesprospectus (we recommend reading the prospectus before making an investment decision), in the key information document and among „Customer Information and Regulatory Issues“ at www.raiffeisenzertifikate.at/en/customer-information. The approval of the base prospectus by the competent authorities is not to be understood as an endorsement of the product by these authorities.

Guarantee Certificate US Stocks (CZK)

- Underlyings: iShares 20+ Year Treasury Bond ETF and MSCI® North America Top ESG Select 4.5% Decrement EUR Index
- Opportunity to obtain an attractive yield at the end of the term: 10% if underlyings quote at or above the starting value

- Issuer risk
- Further information on opportunities/risks on the following pages
- Term of 2 years

The financial instrument described herein is based on an MSCI® index and BlackRock ETF.

Investment product with 100% capital protection
Guarantee Certificate

The certificate has two possible redemption scenarios: 1) Redemption at 110% if both underlyings are at/above 100% of the starting value at the end of the term; 2) 100% capital protection if at least one of the underlyings is below 100% of the starting value at the end of the term.

ISIN / WKN	AT0000A3CZ82
Issuer¹	Raiffeisen Bank International AG
Issue price	100%
Nominal value	CZK 1,000
Subscr. period²	22.05.-26.06.2024
Initial valuation date	27.06.2024
Issue value date	28.06.2024
Final valuation date	25.06.2026
Maturity date	29.06.2026
Underlyings	iShares 20+ Year Treasury Bond ETF and MSCI® North America Top ESG Select 4.5% Decrement EUR Index
Starting value	Closing price of the underlyings on the initial valuation date
Final value	Closing price of the underlyings on the final valuation date
Capital protect.	100% at the end of term
Relevant payout levels	1) 100% of the starting value
Redemption per level	1) 110% of the nominal value
Maximum amount	110% of the nominal value

1 ... Rating: rbinternational.com/ir/ratings

2 ... Early termination/extension of the subscription period is at the discretion of Raiffeisen Bank International AG.

Functionality

At the initial valuation date the starting value and at the final valuation date the final value of the underlyings are determined. At the final valuation date the final values are compared to the starting values and one of the following scenarios will apply:

- Final value of both underlyings \geq 100% of the starting value → Redemption at 110%
If the final value of both underlyings is greater or equal to 100% of the starting value, the certificate will be redeemed at the maturity date at 110% of the nominal value. This amount also represents the maximum redemption (maximum amount).
- Final value of at least one of the two underlyings $<$ 100% of the starting value → Redemption at 100%
If the final value of at least one underlying is below 100% of the starting value, the certificate will be redeemed at the maturity date at 100% of the nominal value.

Example payout profile

Final value*	Redemption**
+20%	110%
+10%	110%
+/-0% (= Starting value)	110%
-5%	100%
-15%	100%
-30%	100%

* in comparison to the starting value ** in percent of the nominal value

The nominal value is capital protected by Raiffeisen Bank International AG at the end of the term, i.e. during the term the price of the certificate can fall below the capital protection level, but at the end of the term investors obtain at least the capital protection amount.

For details on risks and opportunities please see the following pages.

iShares 20+ Year Treasury Bond ETF

An exchange-traded fund registered in the USA that tracks the performance of an index composed of US government bonds with a residual maturity of more than 20 years.

US4642874329

MSCI® North America Top ESG Select 4.5% Decrement EUR

The index includes stocks of U.S. and Canadian companies with mid to large-market capitalizations. For example, NVIDIA, HOME DEPOT, MICROSOFT, ADOBE, CISCO SYSTEMS and others are represented in the index.

Note

The referenced opportunities and risks represent a selection of the most important facts regarding the product.

You are about to purchase a product that is not easy and difficult to understand.

For further information, please refer to the base prospectus (including any supplements) approved by the competent authorities - published at raiffeisenzertifikate.at/en/securities-prospectus/ (we recommend reading the prospectus before making an investment decision) - and to the base information sheets as well as to "Customer information and regulatory matters" raiffeisenzertifikate.at/customer-information

Opportunities

- Return opportunity: Investors can already achieve a return if the price of both underlyings remain constant.
- Capital protection: At the end of the term, the investor obtains at least the capital protection amount.
- Flexibility: Tradability on the secondary market, no management fees

Risks

- Limited yield opportunity: The maximum redemption is limited by the maximum amount.
- Capital protection only at the end of the term: During the term the price of the certificate may drop below the capital protection level; the capital protection applies exclusively at the end of the term. Loss of value due to inflation is not covered by the capital protection.
- Issuer risk / Bail-in: Certificates are not covered by the Deposit Protection Scheme. Investors are exposed to the risk that Raiffeisen Bank International AG might be unable to fulfil its payment obligations in respect of the described financial instrument such as in the event of insolvency (issuer risk) or an official directive (Bail-in). A total loss of the capital invested is possible.

Disclaimer

In spite of all possible care taken, the data contained in this advertisement are provided purely as non-binding information. This advertisement constitutes neither investment advice nor an offer nor a recommendation nor an invitation to execute a transaction. The information contained in this advertisement is generic and no consideration is given to the personal circumstances of potential investors. The information contained in this advertisement substitutes neither the necessary individual investment advice for the purchase or sale of investments nor shall any investment decision be taken on the basis of this document. This advertisement has not been prepared in accordance with legal requirements designed to promote the independence of investment research and is not subject to the prohibition on dealing ahead of the dissemination of investment research.

The complete information for all financial instruments described in this advertisement as well as the sole legal basis for potential transactions in one of the described financial instruments is the Registration Document approved by the Luxembourg Financial Market Authority (CSSF) and the Securities Note approved by the Austrian Financial Market Authority (FMA) - both documents together form the Base Prospectus - together with any supplements and the respective Final Terms of the described financial filed with the FMA. The approval of the Base Prospectus should not be construed as an endorsement of the financial instrument described herein by the competent authorities. Additional information on the financial instruments described herein may also be obtained from the respective key information documents (KIDs) that are available for download free of charge on the website of Raiffeisen Bank International AG (raiffeisenzertifikate.at) by entering the International Securities Identification Number (ISIN) of the respective financial instrument.

Unless otherwise explicitly expressed in any of the cited documents above, no measures have been taken in any national legal system which should permit a public offering of the products described therein.

Raiffeisen Bank International AG explicitly excludes any liability in relation to the correctness, appropriateness and completeness of the information presented herein.

Certificates are risky instruments of wealth investment. Should the price of the respective underlying instrument of a certificate develop adversely, an investor may lose part or all of his or her invested capital. Certificates react more strongly or weakly to changes of the price of the underlying instrument depending on a number of factors (e.g. volatility or correlation of the underlying instruments, interest, dividends, remaining term, changes in foreign exchange rates) and do not move simultaneously with the underlying.

Under certain circumstances the issuer is authorized to redeem the certificates prior to the agreed repayment date.

Issuer Risk/Creditor Participation ("bail-in"): Any payments during or at the end of the term of the certificates depend on the solvency of the issuer ("issuer risk"). Investors are therefore exposed to the risk that Raiffeisen Bank International AG might be unable to fulfil its payment obligations in respect of the described financial instrument such as in the event of insolvency ("issuer risk") or an official directive ("bail-in"). The resolution authority may also issue such an order before any insolvency proceedings if the issuer is judged to be in crisis. Under these circumstances the resolution authority has wide-ranging powers to take action (so-called "bail-in instruments"). For example, it can reduce the claims of investors in respect of the described financial instruments to zero, terminate the described financial instruments, or convert them into shares of the issuer and suspend investors' rights. More detailed further information is available at raiffeisenzertifikate.at/en/basag. A total loss of the invested capital is possible.

Past performance is no reliable indicator of future results. Please refer to the Base Prospectus for additional disclosures on risks as well as further information.

The information presented does not constitute binding tax advice. Tax treatment of investments is dependent on the personal situation of the investor and may be subject to change. As regards tax treatment and impact on the investor's individual tax situation, the investor is advised to consult with a tax advisor. This report is based on the knowledge the persons preparing the document have obtained up to the date of creation. Please note that the legal situation may change due to legislative amendments, tax directives, opinions of financial authorities, jurisdiction etc.

The price of the Capital Protection Certificate is dependent on the underlying's price. Adverse performances of the underlying may cause price fluctuations of the Certificate during the term. If the Capital Protection Certificate is sold prior to the end of the term, there is the risk to incur a substantial loss of the invested capital ("market risk"). The capital protection of 100% of the nominal value applies solely at the end of the term. During the term, the price of the Capital Protection Certificate may drop below the agreed capital protection amount. During the term, the Capital Protection Certificate's price is subject to several influencing factors and needs not develop simultaneously to and in accordance with the underlying's performance. Such influencing factors include e.g. intensity of the underlying's price fluctuations (volatility), interest rates, solvency of the issuer or remaining term. If the Capital Protection Certificate is sold prior to the end of the term, there is the risk to incur a partial loss of the invested capital. Dividends and similar rights associated with the underlying are taken into account when structuring the Capital Protection Certificate and are not paid out.

The MSCI indices are the exclusive property of MSCI Inc. ("MSCI").
