### The Certificate

With the AI/Robotics Bonus&Growth 5 certificate investors participate without any yield limitation at 100% in the performance of the underlying Solactive® Robotics & AI EUR Index 3.5% AR at the end of the term. Provided the barrier of 50% of the starting value was not touched or undercut during the term, the certificate will be redeemed at the minimum of 123% of the nominal value. In the event of a barrier violation during the term investors are exposed to full market risk; this means a substantial capital loss is possible.

Details on the Solactive® Robotics & AI EUR Index 3.5% AR as well as the current list of index members can be found on [the website of the index provider Solactive® AG](#)

### Information on the term

Please note: The price of the certificate is subject to various influencing factors, including the performance of the underlyings, their volatility, correlation and dividend expectations as well as the interest rate level. This price may fall below the issue price and, especially if at least one of the underlyings is close to the barrier, may fluctuate strongly.

Issuer risk / creditor participation: Certificates are not covered by the deposit protection system. There is a risk that Raiffeisen Bank International AG may not be able to meet its payment obligations due to insolvency (issuer risk) or any official orders ("bail-in"). In such cases, the invested capital may be lost in full.

This certificate offers you a redemption of at least 123% if the underlying quoted above the barrier of 50% of its starting value every day during the term. If the underlying has risen by more than 23% at the end of the term, you participate without any yield limitation. If the barrier is violated, investors are exposed to the market risk on a one-to-one basis. This means that a significant loss of capital is possible in this case.

As key technologies of the 21st century, artificial intelligence (AI) and robotics will revolutionize many industries from the ground up over the next few years. Already today, we come into contact with these technologies almost every day - often without realizing it.

### How the certificate works

At the initial valuation date the starting value of the underlying is fixed and from that the barrier is determined. During the observation period the underlying price is compared with the barrier. The following options are available at the end of the term:

#### 1. Barrier not touched or undercut

a) If the underlying price always quoted above the barrier and the final value is at or above the bonus level, redemption is affected on the maturity date according to the underlying performance (percentage performance from the starting value to the final value).

b) If the underlying price always quoted above the barrier and the final value is below the bonus level, the bonus amount is paid out on the maturity date.

#### 2. Barrier was touched or undercut at least once

In this case redemption on the maturity date will be affected according to the underlying performance (percentage performance from the starting value to the final value).

### Payout profile

Raiffeisen Bank International AG explicitly excludes any liability in relation to the correctness, appropriateness and completeness of the information presented herein. Certificates are risky instruments of wealth investment. Should the price of the respective underlying instrument of a certificate develop adversely, an investor may lose part or all of his or her invested capital. Certificates react more strongly or weakly to changes of the price of the underlying instrument depending on a number of factors (e.g. volatility or correlation of the underlying instruments, interest, dividends, remaining term, changes in foreign exchange rates) and do not move simultaneously with the underlying. Under certain circumstances the issuer is authorized to redeem the certificates prior to the agreed repayment date.

**Issuer Risk/Creditor Participation ("bail-in"):** Any payments during or at the end of the term of the certificates depend on the solvency of the issuer ("issuer risk"). Investors are therefore exposed to the risk that Raiffeisen Bank International AG might be unable to fulfil its payment obligations in respect of the described financial instrument such as in the event of insolvency ("issuer risk") or an official directive ("bail-in"). The resolution authority may also issue such an order before any insolvency proceedings if the issuer is judged to be in crisis. Under these circumstances the resolution authority has wide-ranging powers to take action (so-called "bail-in instruments"). For example, it can reduce the claims of investors in respect of the described financial instruments to zero, terminate the described financial instruments, or convert them into shares of the issuer and suspend investors' rights. More detailed further information is available at [raiffeisenzertifikate.at/en/bail-in](https://raiffeisenzertifikate.at/en/bail-in). A total loss of the invested capital is possible. Past performance is no reliable indicator of future results. Please refer to the Base Prospectus for additional disclosures on risks as well as further information.

The information presented does not constitute binding tax advice. Tax treatment of investments is dependent on the personal situation of the investor and may be subject to change. As regards tax treatment and impact on the investor's individual tax situation, the investor is advised to consult with a tax advisor. This report is based on the knowledge the persons preparing the document have obtained up to the date of creation. Please note that the legal situation may change due to legislative amendments, tax directives, opinions of financial authorities, jurisdiction etc.

The Bonus Certificate's price is subject to several influencing factors and need not develop simultaneously to and in accordance with the underlying's performance. Such influencing factors include e.g. intensity of the underlying's price fluctuations (volatility), bond interest rates, solvency of the issuer or remaining term. If the Bonus Certificate is sold prior to the end of the term, there is the risk to incur a partial or even total loss of the invested capital. Dividends and similar rights associated with the underlying are taken into account when structuring the Bonus Certificate and are not paid out.
