The Certificate

With the Bonus Certificate Germany Sustainability Bonus&Growth 4 you participate 100% in the performance of the underlying DAX[®] 50 ESG Price index at maturity with no profit limit. As long as the barrier of 55% of the starting value is not breached during the term, the redemption will be at least 113% of the nominal value. If the barrier is violated, investors are exposed to the market risk on a one-to-one basis. This means that a significant loss of capital is possible in this case.

The payout profile at the end of term is already fixed when the certificate is issued. It is suitable for investors who expect slightly falling/sideways running indices.

The underlying asset is the DAX[®] 50 ESG Price Index. It includes the 50 largest companies from Germany with a highest ESG scoring. Details and a list of the index members can be found on the website of the index provider [STOXX Ltd.](#) This certificate complies with the sustainability standard for Raiffeisen Certificates and takes into account important adverse impacts on sustainability factors ("PAIs").

Issuer risk / creditor participation: Certificates are not covered by the deposit protection system. There is a risk that Raiffeisen Bank International AG may not be able to meet its payment obligations due to insolvency (issuer risk) or any official orders ("bail-in"). In such cases, the invested capital may be lost in full.
