### Repayment at the end of the term

The repayment at the end of the term depends on whether the barrier has been breached or not. This results in two possible scenarios:

#### Scenario 1: Barrier not breached until expiry

**Current scenario, as the barrier has not been breached.**

At the end of the term: repayment	116%
If you purchase the certificate at the current purchase price, this would correspond to the following return	+16.10% (+5.13% p.a.)

#### Scenario 2: Barrier violated at least once

At the end of the term: repayment	1:1 Development*
-----------------------------------	------------------

\*1:1 performance of the underlying with the worse performance (full market risk), but repayment at a maximum of 116%. In the event of a barrier breach, investors are exposed one-to-one to the market risk. This means that in this case, the loss of a significant portion of the invested capital, up to and including total loss, is possible.

#### Price certificate (% of the starting value)

## The Certificate

The Bonus Certificate Europe Bonus&Safety 36 offers a redemption of 116% at the end of term if the index always quotes above the barrier of 49% of its starting value during the term. If the barrier is violated investors are exposed to the market risk on a one-to-one basis and redemption is affected according to the performance of the index, up to a maximum of 116%. A significant loss of capital is possible. The payout profile at the end of term is already fixed when the certificate is issued. It is suitable for investors who expect slightly falling/sideways running indices. The underlying asset is the EURO STOXX 50<sup>®</sup> Index It includes the 50 largest companies from the eurozone. Details and a list of the index members can be found on the website of the index provider [STOXX Ltd.](#)

## Information on the term

Please note: The price of the certificate is subject to various influencing factors, including the performance of the underlyings, their volatility, correlation and dividend expectations as well as the interest rate level. This price may fall below the issue price and, especially if at least one of the underlyings is close to the barrier, may fluctuate strongly.

Issuer risk / creditor participation: Certificates are not covered by the deposit protection system. There is a risk that Raiffeisen Bank International AG may not be able to meet its payment obligations due to insolvency (issuer risk) or any official orders ("bail-in"). In such cases, the invested capital may be lost in full.

Best Issuer  
2025

This certificate will be redeemed in June 2029 at 116% if the EURO STOXX 50® index always quoted above the barrier of 49% of the starting value throughout the term. If the barrier is violated, the certificate is redeemed according to the performance of the index. In this case, a significant capital loss is possible.

### How the certificate works

At the beginning of the term the starting value of the underlying is fixed and the barrier is calculated on this basis. During the observation period, the underlying price is compared with the barrier.

At the end of the term there are two options:

1. Barrier was never touched or undercut  
The certificate is redeemed at 116%.
2. Barrier was touched or undercut at least once  
The certificate is redeemed according to the performance of the index (final value compared to the initial value). The maximum redemption remains limited to 116% of the nominal amount.

### During the term

- You can buy and sell the certificate during trading hours at the current price.
- If the barrier was violated, investors bear the market risk.
- The price of the certificate is subject to various influencing factors, such as the performance of the underlying, the volatility of the underlying, the dividend expectation and the interest rate level. This price may decline below the issue price. If the underlying moves close to the barrier, the price may fluctuate significantly.

### Issuer risk / Bail-in

Certificates are not covered by the Deposit Protection Scheme. Investors are exposed to the risk that Raiffeisen Bank International AG might be unable to fulfil its payment obligations in respect of the described financial instrument such as in the event of insolvency (issuer risk) or an official directive (Bail-in). A total loss of the capital invested is possible.

#### Legal and Risk Disclaimer for Investors

The information provided is for general information purposes only and does not constitute advice, a recommendation or an invitation to enter into a transaction. The information is of a general nature and does not take into account the personal circumstances of potential investors. It is therefore not a substitute for individual investor and investment advice and risk disclosure. The advertisement was not prepared in accordance with the legal requirements designed to promote the independence of investment research and is not subject to the prohibition on trading after the dissemination of investment research.

The complete legal basis for a possible transaction in a financial instrument described here is formed by the registration document approved by the Luxembourg Financial Supervisory Authority (CSSF) and the securities note approved by the Austrian Financial Market Authority (FMA) – both documents together form the base prospectus – along with any supplements and the respective final terms filed with the FMA. The approval of the base prospectus by the competent authority should not be understood as an endorsement of the financial instruments described by this authority. Additional information on the financial instrument is available free of charge in the respective key information documents (KIDs) on the website of Raiffeisen Bank International AG (RBI) after entering the security identification number (ISIN) at [raiffeisencertificates.com](https://raiffeisencertificates.com). Unless explicitly stated in these documents, no measures have been or will be taken in any jurisdiction to allow a public offer of this financial instrument.

**Issuer risk/creditor participation ('Bail-in'):** All payments during the term or at the end of the term of the certificates are dependent on the solvency of RBI (issuer risk). Investors are exposed to the risk that RBI as the issuer may be unable to fulfil its obligations arising from the financial instruments, e.g. in the event of insolvency (insolvency/over-indebtedness) or an official order for resolution measures by the resolution authorities. Such an order by these authorities may also be issued in advance of insolvency proceedings in the event of a crisis at RBI. In such cases, the resolution authority has extensive powers of intervention, known as 'bail-in instruments'. Among other things, it can reduce investors' claims under the financial instruments described to zero, terminate the financial instruments described or convert them into RBI shares, and suspend investors' rights. Further information is available at [raiffeisenzertifikate.at/en/bail-in](https://raiffeisenzertifikate.at/en/bail-in). A total loss of the capital invested is possible.

The Bonus Certificate's price is subject to several influencing factors and need not develop simultaneously to and in accordance with the underlying's performance. Such influencing factors include e.g. intensity of the underlying's price fluctuations (volatility), bond interest rates, solvency of the issuer or remaining term. If the Bonus Certificate is sold prior to the end of the term, there is the risk to incur a partial or even total loss of the invested capital. Dividends and similar rights associated with the underlying are taken into account when structuring the Bonus Certificate and are not paid out.
