#### The Certificate

With the Megatrends Winner 90% II certificate, investors participate at 100% in the performance of the iSTOXX<sup>®</sup> Global Megatrends Select 50 Price EUR index at the end of the term. In case of a negative price development of more than -10%, the capital protection of 90% applies at the end of the term.

Details on the iSTOXX<sup>®</sup> Global Megatrends Select 50 Price EUR index as well as the current list of index members can be found on [the website of the index provider STOXX Ltd.](#) Please note that due to the introduction of new EU standards this certificate is not classified as sustainable within the meaning of the Taxonomy and Disclosure Regulation.

### Information on the term

Please note:

- 90% of the nominal amount is secured by capital protection at the end of the term. During the term, the price may fall below the issue price or the capital protection level. Selling the capital protection certificate before the end of the term may lead to a loss of part of the invested capital.
- Loss of purchasing power due to inflation is not offset by the capital protection.

Issuer risk / creditor participation: Certificates are not covered by the deposit protection system. There is a risk that Raiffeisen Bank International AG may not be able to meet its payment obligations due to insolvency (issuer risk) or any official orders ("bail-in"). In such cases, the invested capital may be lost in full.

Issuer Risk/Creditor Participation ("bail-in"): Any payments during or at the end of the term of the certificates depend on the solvency of the issuer ("issuer risk"). Investors are therefore exposed to the risk that Raiffeisen Bank International AG might be unable to fulfil its payment obligations in respect of the described financial instrument such as in the event of insolvency ("issuer risk") or an official directive ("bail-in"). The resolution authority may also issue such an order before any insolvency proceedings if the issuer is judged to be in crisis. Under these circumstances the resolution authority has wide-ranging powers to take action (so-called "bail-in instruments"). The price of the Capital Protection Certificate is dependent on the underlying's price. Adverse performances of the underlying may cause price fluctuations of the Certificate during the term. If the Capital Protection Certificate is sold prior to the end of the term, there is the risk to incur a substantial loss of the invested capital ("market risk").

The capital protection of 90% of the nominal value applies solely at the end of the term. During the term, the price of the Capital Protection Certificate may drop below the agreed capital protection amount.

During the term, the Capital Protection Certificate's price is subject to several influencing factors and needs not develop simultaneously to and in accordance with the underlying's performance. Such influencing factors include e.g. intensity of the underlying's price fluctuations (volatility), interest rates, solvency of the issuer or remaining term. If the Capital Protection Certificate is sold prior to the end of the term, there is the risk to incur a partial loss of the invested capital. Dividends and similar rights associated with the underlying are taken into account when structuring the Capital Protection Certificate and are not paid out.

Megatrends are major social, economic, political and technological changes that have the potential to change the world sustainably. They usually lead to fundamental social change and can shape our everyday life permanently. Megatrends are particularly robust and withstand temporary resets without losing their momentum. Many investors are aware of their enormous importance and position themselves accordingly.

In order to enable investors to invest sustainably in megatrends, Raiffeisen Centrobank and the renowned index provider STOXX Ltd. collaborated to establish the ESG-compliant iSTOXX® Global Megatrends Select 50 Price EUR index which comprises businesses along the following nine megatrends: Infrastructure, Sharing Economy, Industry 4.0, Smart Cities, Housing Construction, Next Generation Telecoms, Millennials, Fintech and Silver Economy.

This index serves as underlying for the capital protection certificate **Megatrends Winner 90%**, which allows investors to participate 1:1 in the index development at the end of the term. Due to the capital protection of 90% at the end of the term, investors participate in price losses of the index only up to a maximum of -10%. The term of the certificate is 6 years. Details on opportunities and risks are presented on the following page.

### FUNCTIONALITY

#### Beginning of the term:

At the initial valuation date the **closing price** of the iSTOXX® Global Megatrends Select 50 Price EUR index is determined as starting value.

#### End of the term:

At the end of the term, the performance of the iSTOXX® Global Megatrends Select 50 Price EUR index is evaluated. The index starting value is compared to the index closing price at the final valuation date. Investors participate at 100% in the performance of the underlying index. Investors also participate in price losses of up to -10%. In case of a negative index performance of more than 10%, the capital protection of 90% applies.

The **90% capital protection** by Raiffeisen Centrobank only applies at the end of maturity, i.e. during the term the certificate price may drop below 90%, but at the end of the term the investor obtains 90% of the nominal value in the worst case.
