1. What is this product?

Type Austrian law governed inflation rate-linked certificates / Return depends on the performance of the reference rate / Full capital protection against market risk

Term The product has a fixed term and will be due on 19 April 2028.

Objectives The product is designed to provide (1) a return in the form of variable coupon payments calculated by reference to the **reference rate** and (2) repayment of the **product notional amount** on the **maturity date**.

(Terms that appear in **bold** in this section are described in more detail in the table(s) below.)
Coupon: On each **coupon payment date** you will receive a coupon payment calculated by multiplying the **product notional amount** by the applicable **coupon rate**. The relevant dates and coupon rates are shown in the table(s) below.

Coupon payment dates	Coupon rates
22 April 2025	A rate equal to the difference between the reference rate and the inflation strike plus 2.00%, subject to a floor of 2.00%
20 April 2026	A rate equal to the difference between the reference rate and the inflation strike plus 2.00%, subject to a floor of 2.00%
19 April 2027	A rate equal to the difference between the reference rate and the inflation strike plus 2.00%, subject to a floor of 2.00%
Maturity date	A rate equal to the difference between the reference rate and the inflation strike plus 2.00%, subject to a floor of 2.00%

Termination on the maturity date: On the **maturity date** you will receive EUR 1,000.00.

Under the product terms, certain dates specified above and below will be adjusted if the respective date is either not a business day or not a trading day (as applicable). Any adjustments may affect the return, if any, you receive.

The product terms also provide that if certain exceptional events occur (1) adjustments may be made to the product and/or (2) the issuer may terminate the product early. These events are specified in the product terms and principally relate to the product and the issuer. The return (if any) you receive on such early termination is likely to be different from the scenarios described above and may be less than the amount you invested.

When purchasing this product during its lifetime, the purchase price may include proportionate accrued coupon.

Reference rate	The value of the reference rate will be calculated as (1) (A) the inflation index level minus (B) the previous inflation index level divided by (2) the previous inflation index level	Inflation index level	The level of the HICP (2015=100) monthly data - Overall index excluding tobacco Euro area, calculated by Eurostat for the month falling 3 months prior to the end of the relevant coupon period
Underlying market	Inflation rates	Previous inflation index level	The level of the HICP (2015=100) monthly data - Overall index excluding tobacco Euro area, calculated by Eurostat for the month falling 15 months prior to the end of the relevant coupon period
Product notional amount	EUR 1,000	Inflation strike	2.00%
Product currency	Euro (EUR)	Maturity date / term	19 April 2028
Issue date	19 April 2024	Coupon period	Each period from, and including, a coupon payment date (or the issue date , in the case of the initial coupon period) to, but excluding, the next coupon payment date (or the maturity date , in the case of the final coupon period)
Protection amount	EUR 1,000		

Intended retail client The product is intended for private clients, professional clients and qualified counterparties who pursue the objective of general asset accumulation/asset optimization and have a short-term investment horizon. This product is for customers with basic

knowledge and/or experience with financial products. The investor can bear no or only small losses on the capital invested and is willing to accept a level of risk to achieve potential returns that is consistent with the summary risk indicator shown below.

2. What are the risks and what could I get in return?

Risk indicator

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 2 out of 7, which is a low risk class. This rates the potential losses from future performance at a low level, and poor market conditions are very unlikely to impact our capacity to pay you.

To the extent the currency of the country in which you purchase this product or your account currency differs from the product currency, please be aware of currency risk. You will receive payments in a different currency so the final return you will get depends on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.

If we are not able to pay you what is owed, you could lose your entire investment.

For detailed information about all risks relating to the product please refer to the risk sections of the prospectus and any supplements thereto as specified in the section "7. Other relevant information" below.

Performance scenarios What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The scenarios shown are illustrations based on results from the past and on certain assumptions. Markets could develop very differently in the future.

Recommended holding period:		2 years	
Example investment:		EUR 10,000	
Scenarios		If you exit after 1 year	If you exit after 2 years (Recommended holding period)
Minimum	EUR 10,324. The return is only guaranteed if you hold the product to maturity. You could lose some or all of your investment.		
Stress	What you might get back after costs	EUR 9,884	EUR 10,324
	Average return each year	-1.16%	1.61%
Unfavourable	What you might get back after costs	EUR 9,944	EUR 10,324
	Average return each year	-0.56%	1.61%
Moderate	What you might get back after costs	EUR 10,221	EUR 10,615
	Average return each year	2.21%	3.04%
Favourable	What you might get back after costs	EUR 10,605	EUR 11,058
	Average return each year	6.05%	5.17%

The favourable, moderate, unfavourable and stress scenarios represent possible outcomes that have been calculated based on simulations using the past performance of the **reference rate** over a period of up to 5 years. The stress scenario shows what you might get back in extreme market circumstances.

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

3. What happens if Raiffeisen Bank International AG is unable to pay out?

The product is not covered by any statutory or other deposit protection scheme. You may suffer a total loss of your investment if Raiffeisen Bank International AG is unable to make the payments due under the product. This may occur if Raiffeisen Bank International AG becomes insolvent or is affected by resolution measures taken by the competent authority before an insolvency. These measures (referred to as "bail-in") include the partial or full write-down of the notional amount or the conversion of the product into shares of Raiffeisen Bank International AG.

4. What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year you would get back the amount that you invested (0% annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario.
- EUR 10,000 is invested

	<i>If you exit after 1 year</i>	<i>If you exit after 2 years</i>
Total costs	EUR 149	EUR 75
Annual cost impact*	1.50%	0.39% each year

*This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 3.43% before costs and 3.04% after costs.

We may share part of the costs with the person selling you the product to cover the services they provide to you. They will inform you of the amount.

Composition of costs

	One-off costs upon entry or exit	If you exit after 1 year
Entry costs	0.75% of the amount you pay when entering this investment. These costs are already included in the price you pay.	EUR 75
Exit costs	0.73% of your investment before it is paid out to you. These costs are already included in the price you receive and are only incurred if you exit before maturity. If you hold the product until maturity, no exit costs will be incurred.	EUR 73

5. How long should I hold it and can I take money out early?

Recommended holding period: 2 years

The product aims to provide you with the return described under "1. What is this product?" above. However, this only applies if the product is held to maturity. It is therefore recommended that the product is held until 19 April 2028 (maturity).

The product does not guarantee the possibility to disinvest other than by selling the product either (1) through the exchange (if the product is exchange traded) or (2) off-exchange, where an offer for such product exists. Save as otherwise disclosed in exit costs (see section "4. What are the costs?" above), no fees or penalties will be charged by the issuer for any such transaction, however an execution fee might be chargeable by your broker if applicable. By selling the product before its maturity, you may receive back less than you would have received if you had kept the product until maturity.
