This certificate has two redemption options in July 2032:

- Index price at or above the starting value: redemption at 129%
- Index price below the starting value: redemption at 106% (capital protection)

The MSCI® World 4.5% Decrement EUR Index is the underlying of the certificate. The index is based on a global equity index that reflects the performance of companies from industrialised countries worldwide.

How the certificate works

The starting value of the underlying is fixed at the beginning of the term. At the end of the term, the closing price of the underlying is compared with the starting value. Then there are two options:

1. Underlying is unchanged or has risen
The certificate is redeemed at 129% (maximum redemption).
2. Underlying has fallen
The certificate is redeemed at 106% (capital protection).

Examples of redemption

My expectation for the underlying

The payoff profile applies at maturity

- 106% of the nominal amount is secured by the capital protection at the end of term.
- The maximum redemption is limited at 129%.
- Loss of value due to inflation is not covered by the capital protection.

During the term

- You can buy and sell the certificate during trading hours at the current price.
- The price may drop below the issue price or the level of capital protection. Selling the certificate prior to the maturity date may result in a loss of capital.

Issuer risk / Bail-in

Certificates are not covered by the Deposit Protection Scheme. Investors are exposed to the risk that Raiffeisen Bank International AG might be unable to fulfil its payment obligations in respect of the described financial instrument such as in the event of insolvency (issuer risk) or an official directive (Bail-in). A total loss of the capital invested is possible.

MSCI® World 4.5% Decrement EUR Index

The MSCI® World 4.5% Decrement Index is based on the MSCI® World Index, a broadly diversified equity index comprising over 1,300 large and medium-sized companies. This covers companies from 23 developed countries and around 85% of the market capitalisation in each of these markets. The index serves investors as a comprehensive benchmark for global equity investments and is often used to compare the performance of equity portfolios.

The difference between the two indices lies in their calculation as a decrement index: the MSCI® World 4.5% Decrement Index includes net dividends paid out in the calculation of the index. In exchange, 4.5% p.a. is continuously deducted from the index price (daily adjustment).

Legal and Risk Disclaimer for Investors

The information provided is for general information purposes only and does not constitute investment advice, a recommendation or an invitation to execute a transaction. The information is generic and does not take into account the personal circumstances of potential investors. It is therefore not a substitute for individual investor and investment advice and risk disclosure. The advertisement was not prepared in accordance with the legal requirements designed to promote the independence of investment research and is not subject to the prohibition on dealing ahead of the dissemination of investment research.

The complete legal basis for a possible transaction in a financial instrument described here is formed by the registration document approved by the Luxembourg Financial Supervisory Authority (CSSF) and the securities note approved by the Austrian Financial Market Authority (FMA) – both documents together form the base prospectus – along with any supplements and the respective final terms filed with the FMA. The approval of the base prospectus by the competent authority should not be understood as an endorsement of the financial instruments described by this authority. Additional information on the financial instrument is available free of charge in the respective key information documents (KIDs) on the website of Raiffeisen Bank International AG (RBI) after entering the security identification number (ISIN) at raiffeisencertificates.com. Unless explicitly stated in these documents, no measures have been or will be taken in any jurisdiction to allow a public offer of this financial instrument.

Issuer risk/creditor participation ('Bail-in'): All payments during the term or at the end of the term of the certificates are dependent on the solvency of RBI (issuer risk). Investors are exposed to the risk that RBI as the issuer might be unable to fulfil its payment obligations in respect of the financial instruments, e.g. in the event of insolvency (insolvency/over-indebtedness) or an official order for resolution measures by the resolution authority. The resolution authority may also issue such an order before any insolvency proceedings if RBI is judged to be in crisis. Under these circumstances the resolution authority has wide-ranging powers to take action (so-called "bail-in instruments"). Among other things, it can reduce investors' claims under the financial instruments described to zero, terminate the financial instruments described or convert them into RBI shares, and suspend investors' rights. Further detailed information is available at raiffeisenzertifikate.at/en/bail-in. A total loss of the invested capital is possible.

The information presented does not constitute binding tax advice. Tax treatment of investments is dependent on the personal situation of the investor and may be subject to change. As regards tax treatment and impact on the investor's individual tax situation, the investor is advised to consult with a tax advisor. This report is based on the knowledge the persons

preparing the document have obtained up to the date of creation. Please note that the legal situation may change due to legislative amendments, tax directives etc.

The price of the Certificate is dependent on the underlying's price. Adverse performances of the underlying may cause price fluctuations of the Certificate during the term. If the Certificate is sold prior to the end of the term, there is the risk to incur a substantial loss of the invested capital ("market risk"). The capital protection of 106% of the nominal value applies solely at the end of the term. Loss of value due to inflation is not covered by the capital protection. During the term, the price of the Certificate may drop below the agreed capital protection amount. During the term, the Certificate's price is subject to several influencing factors and needs not develop simultaneously to and in accordance with the underlying's performance. Such influencing factors include e.g. intensity of the underlying's price fluctuations (volatility), interest rates, solvency of the issuer or remaining term. If the Capital Protection Certificate is sold prior to the end of the term, there is the risk to incur a partial loss of the invested capital. Dividends and similar rights associated with the underlying are taken into account when structuring the Certificate and are not paid out.
