Repayment at the end of the term

The repayment at the end of the term depends on whether the barrier has been breached or not. This results in two possible scenarios:

Scenario 1: Barrier not breached until expiry

Current scenario, as the barrier has not been breached.

At the end of the term: repayment	120%
If you purchase the certificate at the current purchase price, this would correspond to the following return	+2.14%

Scenario 2: Barrier violated at least once

At the end of the term: repayment	1:1 Development*
-----------------------------------	------------------

*1:1 performance of the underlying with the worse performance (full market risk), but repayment at a maximum of 120%. In the event of a barrier breach, investors are exposed one-to-one to the market risk. This means that in this case, the loss of a significant portion of the invested capital, up to and including total loss, is possible.

The Certificate

With the certificate MSCI World Climate Change Bonus&Safety investors obtain a bonus yield of 20% at the end of the term, provided the underlying MSCI® World Climate Change Top ESG Select 4.5% Decrement index always quotes above the barrier of 49% of its starting value during the observation period. In the event of a barrier violation, investors are exposed to market risk on a one-to-one basis. In this case, a substantial capital loss is possible.

The [index methodology \(PDF\)](#) as well as further details on the index can be found on [the website of the index provider MSCI](#) by selecting the respective index in the dropdown menu. This certificate complies with the [sustainability standard for Raiffeisen Certificates](#) and takes into account important adverse impacts on sustainability factors ("PAIs").

Sustainability

This certificate complies with the sustainability standard for Raiffeisen Certificates.

Information on the term

Please note: The price of the certificate is subject to various influencing factors, including the performance of the underlyings, their volatility, correlation and dividend expectations as well as the interest rate level. This price may fall below the issue price and, especially if at least one of the underlyings is close to the barrier, may fluctuate strongly.

Issuer risk / creditor participation: Certificates are not covered by the deposit protection system. There is a risk that Raiffeisen Bank International AG may not be able to meet its payment obligations due to insolvency (issuer risk) or any official orders ("bail-in"). In such cases, the invested capital may be lost in full.

Issuer Risk/Creditor Participation ("bail-in"): Any payments during or at the end of the term of the certificates depend on the solvency of the issuer ("issuer risk"). Investors are therefore exposed to the risk that Raiffeisen Bank International AG might be unable to fulfil its payment obligations in respect of the described financial instrument such as in the event of insolvency ("issuer risk") or an official directive ("bail-in"). The resolution authority may also issue such an order before any insolvency proceedings if the issuer is judged to be in crisis. Under these circumstances the resolution authority has wide-ranging powers to take action (so-called "bail-in instruments"). For example, it can reduce the claims of investors in respect of the described financial instruments to zero, terminate the described financial instruments, or convert them into shares of the issuer and suspend investors' rights. More detailed further information is available at raiffeisenzertifikate.at/en/bail-in. A total loss of the invested capital is possible.

The information presented does not constitute binding tax advice. Tax treatment of investments is dependent on the personal situation of the investor and may be subject to change.

The Bonus Certificate's price is subject to several influencing factors and need not develop simultaneously to and in accordance with the underlying's performance. Such influencing factors include e.g. intensity of the underlying's price fluctuations (volatility), bond interest rates, solvency of the issuer or remaining term. If the Bonus Certificate is sold prior to the end of the term, there is the risk to incur a partial or even total loss of the invested capital. Dividends and similar rights associated with the underlying are taken into account when structuring the Bonus Certificate and are not paid out.
