The decision of the ECB to add corporate bonds to its bond purchasing programme has further lowered yields in this asset category. Bonds of particulary solid companies often generate negative returns. Against this backdrop, even contingently risk tolerant investors take an interest in equity investments. Nevertheless, many investors are not prepared to bear the full price risk.

For security-oriented investors, Raiffeisen Centrobank AG has issued the **Dividend Stocks Winner IV 95%**, which provides 95% capital protection at the end of the term. The certificate offers a participation of 145% in the positive average performance of a dividend index of the renowned Swiss index house STOXX Limited. Further details regarding opportunities and risks are presented on the following page.

The **STOXX® Global Select Dividend 100 Index (EUR)** serves as underlying for the certificate. The index focuses on the highest dividend-yielding stocks of North America, Europe and Asia/Oceania. These stocks with above-average profit participation are usually less volatile and more stable than the overall market. Criteria for the selection of the stocks included in the index are the continuous growth of dividend yield and the regular payment of dividends.

FUNCTIONALITY

At the initial valuation date the **starting value** of the STOXX® Global Select Dividend 100 Index (EUR) is determined (closing price of the index). Once a year, at the respective annual valuation date (2017–2024), the closing price of the index is compared with its starting value and the **index performance** is calculated (percentage index performance from the starting value to the closing price at the respective valuation date). At the end of the term the arithmetic average performance of the STOXX® Global Select Dividend 100 Index (EUR) of the eight annual valuation dates is determined.

At the maturity date 145% of the **positive average performance** are paid out **in addition to the capital protection of 95%** of the nominal value.

The investment is 95% capital protected. At the end of the term the investors obtain 95% of the nominal value regardless of the market performance.

- Redemption is dependent on the solvency of Raiffeisen Centrobank (issuer risk). In case of insolvency of the issuer the investor may incur a total loss.
