Opis

Provided that during the term the underlying always quotes above the barrier, the investor obtains the bonus amount pursuant to the bonus level, or the respective higher amount, at the end of the term. In case of a cap, the cap represents the maximum payout. If, during the term, the barrier is touched or undercut, the bonus mechanism is suspended. At the maturity date the certificate is redeemed analogue to the performance of the underlying.

Types of Bonus Certificates are Bonus Certificates with Cap, Bonus Certificates without Cap, Bonus Certificates with Coupon, Plus+ Bonus Certificates, Reverse Bonus Certificates and Twin Win-Certificates.

Wyniki osiągnięte w przeszłości nie są wiarygodnym wskaźnikiem przyszłych wyników. Od emisji tego instrumentu finansowego minęło mniej niż pięć lat.

Disclaimer
Ryzyko emitenta:

Jako obligacja na okaziciela, certyfikat nie podlega austriackiej ochronie depozytów. Jeśli w przypadku niewypłacalności emitent nie jest w stanie wywiązać się ze swoich emitent nie jest w stanie wywiązać się ze swoich zobowiązań wynikających z certyfikatu lub jest w stanie wywiązać się z nich tylko częściowo. tylko częściowo, posiadacze certyfikatów mogą stracić znaczną część znaczną część zainwestowanego kapitału, a nawet nawet całkowitą stratę. Ryzyko to jest często określane jako „ryzyko emitenta” lub »ryzyko zdolności kredytowej«.

Possibility of Bail-in:

The Federal Act on the Recovery and Resolution of Banks (“BaSAG”) applies. The BaSAG regulates the possibility of the regulatory resolution of banks that have run into difficulties. Holders of certificates may be affected by such a regulatory measure with their claims to payment(s) (the so-called “bail-in”), and this may result in the loss of a substantial part of the invested capital or even a total loss for all types of certificates.

Certyfikaty bonusowe

Co należy wziąć pod uwagę przed zakupem:

- **Market risk:** The price of the Bonus Certificate is dependent on the underlying's performance. An unfavourable performance of the underlying may result in price fluctuations of the certificate during the term. This may result in a partial or even total loss of the invested capital.
- **Barrier event:** If the barrier of the Bonus Certificate is touched or undercut during the term, the protection mechanism is suspended. In this case, the investor is exposed to the market risk on a one-to-one basis and a substantial capital loss is possible. The redemption at the end of the term is then usually one-to-one with the underlying performance.
- **Price performance:** During the term, the certificate's price is not only dependent on the underlying's performance but on various influencing factors such as the underlying's volatility, interest rates, issuer's solvency or remaining term. Selling the Bonus Certificate prior to maturity may result in a partial or even total loss of the invested capital.
- **Yield limitation:** Depending on the product structure, a Bonus Certificate may have a maximum payout amount (e.g. cap/ maximum amount or fixed interest amount).
- **Currency risk:** If the underlying quotes in a currency that is different and the product does not provide for currency hedging, changes in the exchange rate during the term of the Bonus Certificate will also affect the value of the certificate. This can additionally increase the loss from the Bonus Certificate due to the market risk.
- **Payouts of the underlying:** Dividends and comparable claims from the ownership of the underlying are taken into account in the certificate's structure and are not paid out.
