Wyniki osiągnięte w przeszłości nie są wiarygodnym wskaźnikiem przyszłych wyników. Od emisji tego instrumentu finansowego minęło mniej niż pięć lat.

## Disclaimer

### Ryzyko emitenta:

Jako obligacja na okaziciela, certyfikat nie podlega austriackiej ochronie depozytów. Jeśli w przypadku niewypłacalności emitent nie jest w stanie wywiązać się ze swoich emitent nie jest w stanie wywiązać się ze swoich zobowiązań wynikających z certyfikatu lub jest w stanie wywiązać się z nich tylko częściowo. tylko częściowo, posiadacze certyfikatów mogą stracić znaczną część znaczną część zainwestowanego kapitału, a nawet nawet całkowitą stratę. Ryzyko to jest często określane jako „ryzyko emitenta” lub »ryzyko zdolności kredytowej«.

### Possibility of Bail-in:

The Federal Act on the Recovery and Resolution of Banks (“BaSAG”) applies. The BaSAG regulates the possibility of the regulatory resolution of banks that have run into difficulties. Holders of certificates may be affected by such a regulatory measure with their claims to payment(s) (the so-called “bail-in”), and this may result in the loss of a substantial part of the invested capital or even a total loss for all types of certificates.

## Certyfikaty z ochroną kapitału Co należy wziąć pod uwagę przed zakupem:

- **Market risk:** The price of the Capital Protection Certificate is dependent on the underlying's performance. An unfavourable performance of the underlying may result in price fluctuations of the certificate during the term. Selling the certificate prior to maturity may result in a partial loss of the invested capital.
- **Capital protection:** The capital protection only applies at the end of term. During the term, the certificate price may drop below the agreed capital protection. Loss in value due to inflation is not covered by capital protection.
- **Price performance:** During the term, the Capital Protection Certificate's price is not only dependent on the underlying's performance but on various influencing factors such as the underlying's volatility, interest rates, issuer's solvency or remaining term. Selling the Capital Protection Certificate prior to maturity may result in a partial loss of the invested capital.
- **Limited yield opportunity:** Depending on the product design, a Capital Protection Certificate may have a maximum redemption (maximum amount).
- **Currency risk:** If the underlying quotes in a currency that is different to the Capital Protection Certificate's currency, and the certificate is not currency hedged, exchange rate fluctuations during the term impact the price of the Capital Protection Certificate.
- **Payouts of the underlying:** Dividends and comparable claims from the ownership of the underlying are taken into account in the certificate's structure and are not paid out.

This advertisement serves exclusively as non-binding information, for whose correctness, topicality and completeness no guarantee is assumed by the creator. The information contained herein does not constitute an offer and is neither recommendations nor financial analyses. They are not a substitute for investor and investment-oriented advice on buying and selling the financial instrument.

The base prospectus (and any supplements) of the financial instrument, as well as the respective basic information sheet (KID), can be downloaded from the website of Raiffeisen Bank International AG (RBI) [raiffeisenzertifikate.at/en/securities-prospectus/](https://raiffeisenzertifikate.at/en/securities-prospectus/). The approval of the base prospectus does not constitute an endorsement of this financial instrument by the competent authority (FMA). You are about to acquire a product that is not easy and may be difficult to understand. We recommend reading the prospectus before making an investment decision.

The information presented does not constitute binding tax advice. Tax treatment of investments is dependent on the personal situation of the investor and may be subject to change.

If the underlying is not quoted in the same currency as the product and if the certificate is not currency hedged, the foreign exchange rate influences the Certificate's price during the term (currency risk).

The value of the structured securities is additionally influenced by changes of prices for future deliveries of commodities traded on the futures market (futures market curve). Certificates on commodities are usually based on commodity futures, which generally have a limited maturity. Before their maturity ("expiration") they are "rolled" into the new futures contract. This can result in either "roll yield or roll losses, depending on the respective market situation. Any such yields or losses are taken into account when calculating the subscription ratio of the certificate.

The financial instrument and the associated product documents may not be offered, sold, resold or delivered or published, either directly or indirectly, to natural or legal persons who are resident/registered office in a country in which this is prohibited by law. In no event may this document be distributed in the United States of America ("U.S.A.")/to U.S. persons and the United Kingdom ("U.K.").
