Opis

With the certificate **USD Nasdaq-100 Twin Win 3** you participate in rising prices of the underlying up to a maximum of +40%. As long as the barrier is not violated, price losses of the underlying are converted into gains at maturity. If the barrier is violated, you are exposed 1:1 to the market risk and a substantial capital loss is possible.

Details on the **Nasdaq 100® Index** can be found on [Nasdaq-100® Index](#) the [website of the index provider](#).

Disclaimer

Ryzyko emitenta:

Jako obligacja na okaziciela, certyfikat nie podlega austriackiej ochronie depozytów. Jeśli w przypadku niewypłacalności emitent nie jest w stanie wywiązać się ze swoich emitent nie jest w stanie wywiązać się ze swoich zobowiązań wynikających z certyfikatu lub jest w stanie wywiązać się z nich tylko częściowo. tylko częściowo, posiadacze certyfikatów mogą stracić znaczną część znaczną część zainwestowanego kapitału, a nawet nawet całkowitą stratę. Ryzyko to jest często określane jako „ryzyko emitenta” lub »ryzyko zdolności kredytowej«.

Possibility of Bail-in:

The Federal Act on the Recovery and Resolution of Banks (“BaSAG”) applies. The BaSAG regulates the possibility of the regulatory resolution of banks that have run into difficulties. Holders of certificates may be affected by such a regulatory measure with their claims to payment(s) (the so-called “bail-in”), and this may result in the loss of a substantial part of the invested capital or even a total loss for all types of certificates.

Certyfikaty bonusowe

Co należy wziąć pod uwagę przed zakupem:

- **Market risk:** The price of the Bonus Certificate is dependent on the underlying's performance. An unfavourable performance of the underlying may result in price fluctuations of the certificate during the term. This may result in a partial or even total loss of the invested capital.
- **Barrier event:** If the barrier of the Bonus Certificate is touched or undercut during the term, the protection mechanism is suspended. In this case, the investor is exposed to the market risk on a one-to-one basis and a substantial capital loss is possible. The redemption at the end of the term is then usually one-to-one with the underlying performance.
- **Price performance:** During the term, the certificate's price is not only dependent on the underlying's performance but on various influencing factors such as the underlying's volatility, interest rates, issuer's solvency or remaining term. Selling the Bonus Certificate prior to maturity may result in a partial or even total loss of the invested capital.
- **Yield limitation:** Depending on the product structure, a Bonus Certificate may have a maximum payout amount (e.g. cap/ maximum amount or fixed interest amount).
- **Currency risk:** If the underlying quotes in a currency that is different and the product does not provide for currency hedging, changes in the exchange rate during the term of the Bonus Certificate will also affect the value of the certificate. This can additionally increase the loss from the Bonus Certificate due to the market risk.
- **Payouts of the underlying:** Dividends and comparable claims from the ownership of the underlying are taken into account in the certificate's structure and are not paid out.
