Certyfikaty z ochroną kapitału: Prosto wyjaśnione

Capital Protection - Description - Product in Focus

Inwestowanie w papiery wartościowe wiąże się nie tylko z szansami, ale też z ryzykiem.

Potential return depending on the structure of the certificate

- Payout at the end of term ...
 - ... at the pre-defined redemption level, depending on the performance of the underlying
 - ... according to the performance of the underlying, The participation factor indicates the extent to which investors participate in the performance.
- Payout during the term ...
 - ... in the form of interest rates (fixed or variable), paid annually for example if the certificate provides ongoing yields. If the interest rate is fixed, it is paid out regardless of the performance of the underlying.

The payout profile applies at the end of the term

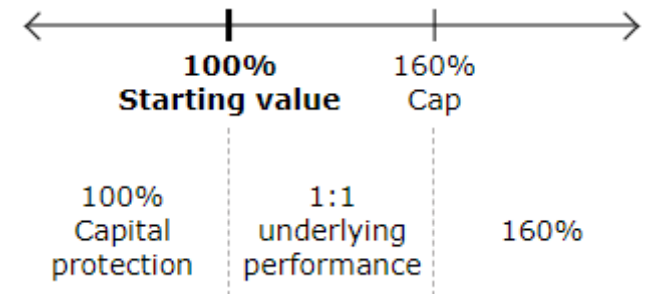

- The protection of the invested capital refers exclusively at the end of term. If the capital protection is 100%, the investor receives at least 100% of the nominal value back.
- Loss of value due to inflation is not covered by the capital protection.

Proszę pamiętać:

- In the event of adverse performances of the underlying or a rise in interest rates for example, the price may drop below the issue price or the capital protection amount during the term.

Example of a payout profile at end of term

If the final value of the underlying is ...

... below 100 % compared to the starting value, redemption is effected at 100% of the nominal value.

... between 100 % and 160 % compared to the starting value, redemption is effected according to the performance of the underlying.

... above 160 % compared to the starting value, redemption is effected at 160% of the nominal value.

Disclaimer

In spite of all possible care taken, the data contained in this advertisement are provided purely as non-binding information. This advertisement constitutes neither investment advice, an offer or a recommendation nor an invitation to execute a transaction. The information contained in this advertisement is generic and no consideration is given to the personal circumstances of potential investors. The information contained in this advertisement substitutes neither the necessary individual investment advice for the purchase or sale of investments nor shall any investment decision be taken on the basis of this document. This advertisement has not been prepared in accordance with legal requirements designed to promote the independence of investment research and is not subject to the prohibition on dealing ahead of the dissemination of investment research.

You are about to purchase a product that is not simple and may be difficult to understand. Certificates are not covered by the Deposit Protection Scheme. Additional information on the financial instruments described herein may also be obtained from the respective key information documents that are available for download on the website of Raiffeisen Bank International AG (raiffeisenzertifikate.at/en/). The sole legal basis for all financial instruments described in this advertisement is the Base Prospectus (including any possible supplements or amendments) which has been approved by the competent authority (FMA) in connection with the corresponding Final Terms of the financial instruments. The approval of the Base Prospectus by the competent authorities should not be understood as an endorsement of the financial instruments described herein by the competent authorities. We recommend that you read the prospectus before making an investment decision. These documents as well as further information are provided on the website of Raiffeisen Bank International AG at raiffeisenzertifikate.at/en/securitiesprospectus or raiffeisenzertifikate.at. Additional information on the financial instruments described herein may also be obtained from the respective key information documents (KIDs) that are available for download free of charge on the website of Raiffeisen Bank International AG (raiffeisenzertifikate.at/en/) by entering the International Securities Identification Number (ISIN) of the respective financial instrument.

Issuer Risk/Creditor Participation ("bail-in"): Certificates are not covered by the Deposit Protection Scheme. Any payments during or at the end of

the term of the certificates depend on the solvency of the issuer ("issuer risk"). Investors are therefore exposed to the risk that Raiffeisen Bank International AG might be unable to fulfil its payment obligations in respect of the described financial instrument such as in the event of insolvency ("issuer risk") or an official directive ("bail-in"). The resolution authority may also issue such an order before any insolvency proceedings if the issuer is judged to be in crisis. Under these circumstances the resolution authority has wide-ranging powers to take action (so-called "bail-in instruments"). For example, it can reduce the claims of investors in respect of the described financial instruments to zero, terminate the described financial instruments, or convert them into shares of the issuer and suspend investors' rights. More detailed further information is available at raiffeisenzertifikate.at/en/bail-in. A total loss of the invested capital is possible.

Past performance is no reliable indicator of future results. Please refer to the Base Prospectus for additional disclosures on risks as well as further information. If the underlying is not quoted in the same currency as the product and if the Certificate is not currency hedged, the foreign exchange rate influences the Certificate's price during the term (currency risk). Dividends and similar rights associated with the underlying are taken into account when structuring the Certificate and are not paid out.

The price of the **Capital Protection Certificate** is dependent on the underlying's price. Adverse performances of the underlying may cause price fluctuations of the Certificate during the term. If the Capital Protection Certificate is sold prior to the end of the term, there is the risk to incur a substantial loss of the invested capital (market risk). The capital protection of the nominal value applies solely at the end of the term. During the term, the price of the Capital Protection Certificate may drop below the agreed capital protection amount. During the term, the Capital Protection Certificate's price is subject to several influencing factors and need not develop simultaneously to and in accordance with the underlying's performance. Such influencing factors include e.g. intensity of the underlying's price fluctuations (volatility), interest rates, solvency of the issuer or remaining term. If the Capital Protection Certificate is sold prior to the end of the term, there is the risk to incur a partial loss of the invested capital. The Capital Protection Certificate's final terms may provide for a maximum payout. Loss of value due to inflation is not covered by the capital protection.

The **Bonus Certificate's** price is subject to several influencing factors and

need not develop simultaneously to and in accordance with the underlying's performance. Such influencing factors include e.g. intensity of the underlying's price fluctuations (volatility), bond interest rates, solvency of the issuer or remaining term. If the Bonus Certificate is sold prior to the end of the term, there is the risk to incur a partial or even total loss of the invested capital (price performance).

The price of the **Reverse Convertible Bond** is dependent on the underlying's price. Adverse performances of the underlying may cause price fluctuations of the Reverse Convertible Bond. If the Reverse Convertible Bond is sold prior to the end of the term, there is the risk to incur a substantial loss or even a total loss of the invested capital (market risk). If the Reverse Convertible Bond's final terms provide for a barrier, this protective mechanism is suspended if the barrier is touched or undercut during the term and the Reverse Convertible Bond is then fully subject to market risk. The Reverse Convertible is subject to several influencing factors and need not develop simultaneously to and in accordance with the underlying's performance. Such influencing factors include e.g. intensity of the underlying's price fluctuations (volatility), interest rates, solvency of the issuer or remaining term. If the Reverse Convertible Bond is sold prior to the end of the term, there is the risk to incur a partial or even total loss of the invested capital (price performance).

The price of the **Express Certificate** is dependent on the underlying's price. Adverse performances of the underlying may cause price fluctuations of the Express Certificate. If the Express Certificate is sold prior to the end of the term, there is the risk to incur a substantial loss or even a total loss of the invested capital (market risk). If the Express Certificate's barrier is touched or undercut, the protective mechanism is suspended and the Express Certificate is fully subject to market risk (barrier event). The Certificate is then redeemed analogue to the underlying's performance or in the case of Express Certificates on single sales the shares are physically delivered. The Express Certificate is subject to several influencing factors and need not develop simultaneously to and in accordance with the underlying's performance. Such influencing factors include e.g. intensity of the underlying's price fluctuations (volatility), interest rates, solvency of the issuer or remaining term. If the Express Certificate is sold prior to the end of the term, there is the risk to incur a partial or even total loss of the invested capital (price performance). The maximum yield to be obtained from the underlying's performance is limited by the maximum payout (cap). The maximum

yield to be obtained from the underlying's performance is capped by the maximum payout.
